ZIPORIN, Z. Z. See Morrissey, R. L., 1027.

A

Absorption, amino acids along the intestinal tract of chicks fed heated and raw soybean meal, 1775.
—, carbohydrate, in young protein deficient rats, 690.
—, cholesterol, effects of dietary oil level and phytosterols, 1996.
—, —, effects of plant sterols, 1139.
—, iron, effects of dietary protein, glycine and tryptophan in the growing chick, 24.
—, —, enhancement in iron depleted rats by dietary fat, 1687.
—, —, in the intestinal mucosa of the neonatal piglet, 487.
—, rat jejunal mucosa uptake of pyridoxine hydrochloride in vitro, 126.
—, thiamin, site and extent in the rat, 353.
—, triglyceride, zinc deficiency effects on intestinal transport, 909.
Acethlcholine levels and utilization in vivo in rat brain effects of thiamin deficiency, 1902.
N-Acetyl-methionine, dietary excess, effects on growing rats, 357.
Acid production in the gastrointestinal tract of the rock hydrax and patterns of digesta movement, 1954.
Adenine, dietary effects on growth and metabolism of rats, 1044.
Adipose tissue enzymes, carbohydrate and lipid metabolism and glucose uptake by rat epididymal adipose tissue, effect of vitamin B_6 deficiency, 443.
— —, dietary methyl esters of long-chain saturated and polyunsaturated fatty acids on rat lipogenesis, 1170.
— —, glucagon effects on fatty acid synthesis in fasted and refed rats, 942.
— —, growth, a multifactor analysis in the rat, 1969.
— —, (−)-hydroxycitrate influence on lipogenesis in chickens and rats, 112.
— — lipogenesis in meal-fed rats, influence of dietary fatty acids, 1277.
— —, lipogenic enzyme activities, influence of dietary lipid in coho salmon, 846.
— —, lipoprotein lipase activity in rats fed a high and low fat diet, 199.
— — lipoprotein lipase, response to fasting in the chicken and rat, 990.
— —, turnover rate in exercise trained rats, effects of dietary carnitine, 132.
— — weight of rats fed starch or sucrose diets ad libitum or in meals, 147.
Adrenal calcium, influence of vitamin C restriction in guinea pigs, 1846.
Aging, tissue lipofuscin pigment concentration in mice, effect of dietary vitamin E, 1792.
Alanine aminotransferase, postnatal brain development in pyridoxine deficient chicks, 1602.
— turnover and incorporation into glucose, influence of diet in dogs, 397.
Alces alces gigas, copper deficiency in a subpopulation of Alaskan moose, 1182.
Alcoholism, chronic ethanol administration effects on thiamin metabolism in the rat, 2144.
—, hepatic lipid accumulation, effect of dietary composition of rats with chronic ethanol intake, 1114.
Alkaline phosphatase levels (serum and duodenal) in fed and fasted magnesium deficient rats, 1061.
— —, zinc requirement of the young guinea pig, 1517.
Alkali-treated soybean protein, biological effects of feeding graded levels of lysinoalanine in rats, 1190.
Allopurinol, dietary effects on growth and metabolism of rats, 1044.
American Institute of Nutrition, Proceedings of Annual Meeting, 1555.
Amino acid(s) absorption along the intestinal tract of chicks fed heated and raw soybean meal, 1775.
— — —, stimulation by fructose in epithelial cells isolated from rat intestine, 767.
— — catabolizing enzymes and free amino acids of liver and plasma in adult cockerels fed diets containing graded levels of protein, 829.
— —, dietary effects on pancreatic protein secretion in rats, 281.
— — fortification, wheat diets fed at varying levels of energy intake to rats, 289.
— — — of bread fed at varying energy levels during gestation and lactation in rats, 300.
— — metabolism, histidine intake and hepatic histidase activity effects on metabolism of histidine in vivo, 1427.
— — —, incorporation of $^{15}NH_4Cl$ into histidine in adult man, 621.
— — —, milk production, nitrogen utilization and glucose synthesis in lactating cows infused postruminally with sodium caseinate and glucose, 631.
— — —, response to prolonged fasting and refeeding in the pig, 426.
— — metabolizing enzymes of rat liver, early effect of hypervitaminosis A, 1809.
D-Amino acid oxidase, utilization of riboflavin homologues, 645.
Amino acid, plasma levels, effects of Aspartame and aspartate loading in normal adult volunteers, 1837.
— —, plasma, dietary histidine and arginine effect in men fed a low nitrogen diet, 2078.
— — —, lysine and tryptophan, determination of the optimum dietary proportions for growing pigs based on growth, food intake and plasma metabolites, 1369.
— — —, lysine and tryptophan, determination of optimum dietary proportions for growing rats

based on growth, food intake and plasma metabolites, 1361.
— — —, L-methionine and L-cystine in channel catfish, 2031.
— — —, quantitative requirements of the hatchling green sea turtle for lysine, tryptophan and methionine, 171.
— — —, valine, leucine, isoleucine and phenylalanine, of the hatchling green sea turtle, 1502.
— — —, valine requirement of the growing kitten, 1308.
— — supplementation, casein diet for catfish, 1153.
— — —, methionine and threonine, effect on urinary nitrogen excretion and tissue free amino acids, 783.
— — utilization and lysine requirement of fingerling channel catfish, effect of dietary pH, 166.
α-Amino isobutyric acid, placental transfer in the rat, 2002.
α-Amino-*n*-butyric acid, methionine formation in the rat, 1927.
Amino quinolines, vitamin E deficient-lead-poisoned rats, effect on the filterability of erythrocytes, 2135.
Ammonia, intraportal, stimulatory effect on plasma uric acid concentration and urinary uric acid excretion in chickens fed a low protein diet, 1147.
Amylase synthesis (pancreatic) adaptation to changes in diet, 87.
—, xylitol associated changes of monkey parotid salivia, 1763.
Anemia, iron supplementation of the lactation mouse and suckling neonate, 1377.
—, lead intoxication, a role for copper, 1779.
—, selenium and vitamin E effects in lead-poisoned rats, 378.
—, vitamin E deficiency (prolonged) in the rat, 1200.
—, voluntary activity, cardiovascular and muscle response in rats, 1595.
Antioxidants, encephalomalacia of chicks induced by dilauryl succinate, preventive effects against, 35.
Aorta, meal-feeding effects on insulin sensitivity and incorporation of glucose into rat aorta, 1896.
Apis mellifera, some carbohydrate found in pollen and pollen substitutes are toxic to honey bees, 1859.
Arginine, dietary deficiency, effects on chronically uremic rats, 495.
—, dietary, nitrogen retention, 2069.
—, —, plasma amino acid and urea concentration of men fed a low nitrogen diet, 2078.
— supplementation of a casein diet for catfish, 1153.
Ascorbic acid, (see Vitamin C).
Aspartame, plasma and erythrocyte free amino acid levels in normal adult volunteers, 1832.
Aspartate aminotransferase, postnatal brain development in pyridoxine deficient chicks, 1602.
— loading, plasma and erythrocyte free amino acid levels in normal adult volunteers, 1837.
Aspirin toxicity, analogous effects of zinc deficiency in pregnant rats, 1222.
Availability of spray dried lard water protein in rats and chicks, 1022.

B

Bactericidal activities of leukocytes in ascorbic acid deficient guinea pigs, 1507.
Bile acid excretion, controlling factors in the maintenance of plasma cholesterol concentration, 596.
Biographical sketch, James Boyd Allison, 701.
— —, Max Josef von Pettenkofer, 1567.
— —, William Prout, 15.
Biohydrogenation and availability of linoleic acid in lactation cows, 1755.
Biotin deficiency, hepatic propionyl-CoA carboxylase in the cat, 330.
Blood brain barrier, brain iron in the rat, extremely slow turnover in normal rats may explain long-lasting effects of early iron deficiency, 1075.
Body composition, diet composition influence in meal-eating and nibbling rats, 1768.
— —, dietary lipids, protein and environmental temperature, effects on growth, feed conversion and body composition of channel catfish, 272.
— —, ethanol effects in weanling rats, 614.
— —, food intake and body weight gain in the young obese mouse, 1715.
Bone ash, relative activities of some metabolites and analogs of cholecalciferol in stimulation of tibia ash weight in rats otherwise deprived of vitamin D, 194.
—, biomechanical and morphological changes, effect of ethane-1-hydroxy-1,1-diphosphate and dietary fluoride in chicks, 747.
—, calcium and glycoseaminoglycan metabolism, effect of vitamin A deficiency in guinea pig, 2198.
— development, protein-energy malnutrition effects on mandible and long-bone growth in newborn rats, 983.
—, long-term effect of low dietary calcium:phosphate ratio on skeleton of monkeys, 834.
— marrow, mast cell population in magnesium deprived rats, influence of sex hormones, 2164.
— —, orthochromatophilic normoblasts accumulation of vitamin E deficient monkeys, 2026.
— mineralization, ascorbic acid and citric acid effect on calcium metabolism in chicken, 1484.
Brain, calcium binding protein, response to cholecalciferol and development of the chick, 480.
— development, (postnatal), pyridoxine deficiency and postnatal aspartate and alanine amino transferase activities and cholesterol levels in chicks, 1602.
— enzyme activities during early development, effect of dietary protein levels in rats, 1094.
— enzymes, dietary protein levels, effects during early development in rats, 1102.
— iron in the rat, extremely slow turnover in normal rats may explain long-lasting effects of early iron deficiency, 1075.
— protein synthesis, effects of zinc deficiency in suckling rats, 1082.
— serotonin metabolism, plasma levels in chronically uremic rats, 840.
—, thiamin deficiency, effects on acetylcholine levels and utilization in vivo in rat, 1902.
Bran, dietary fiber effects on cholesterol metabolism in rats, 466.

Branched-chain amino acid antagonism in the rat, effects on tissue amino acid and keto acid concentrations, 887.
— α-keto acids, effects on hepatic branched-chain α-keto acid dehydrogenase in the rat, 1528.
Bread, amino acid fortification, fed at varying energy levels during gestation and lactation in rats, 300.
Breast muscle, histidine status in the chick, 2055.

C

Cadmium toxicity in rats, role of dietary calcium and calcium binding protein in rats, 920.
Calcium binding protein, response in brain to cholecalciferol and development of the chick, 480.
— contents of organs, long-term effects of suboptimal dietary magnesium in rats, 1640.
—, dietary, and calcium binding protein in cadmium toxicity in rats, 920.
— metabolism, ascorbic and citric acid effects in chickens, 1484.
—, cellulose added to diets of high and low fiber content fed to man, 510.
— —, homeostatic mechanisms in the cow, morphologic and biochemical studies, 2244.
— —, mediation by 1,25-dihydroxycholecalciferol in chicks, 1975.
— —, vitamin A deficiency effect in guinea pig bone, 2198.
—:phosphate ratio, long-term effect on the skeleton of *cibus albifrons* monkeys, 834.
—, plasma, changes after injection of massive doses of cholecalciferol or 25-hydroxycholecalciferol in nonlactating dairy cows, 606.
—, serum and urinary, physiological response of human adults, 42.
Campesterol, absorption of dietary cholesterol, 1139.
Carbohydrate absorption in young of protein-deficient rats, 690.
—, dietary, energy utilization of genetically obese rats and mice, 320.
—, dietary, gastric emptying in rats, 104.
—, —, lactate, alanine and serine turnover and incorporation into glucose in the dog, 397.
— intolerance induced by chromium in rats, 1702.
— metabolism, vitamin B_6 deficiency effects upon enzymes in liver, kidney and adipose tissue, 443.
— pollen, some are toxic to honey bees, 1859.
— -sensitive BHE rat, a strain specific increase in blood glycerol level, 1884,
Carbon tetrachloride induced lipid peroxidation, protection against by dietary vitamin E, selenium and methionine as measured by ethane evolution, 656.
Carcinogenesis, malonaldehyde content of food, 1404.
—, safflower oils high in oleic or linoleic acid, effect on mammary tumors induced in rats by 7,12-dimethylbenz(α)anthracene, 1353.
Cardiovascular and muscle response to anemia in rats, 1595.
Carnitine deficiency, effects in male and female rats fed wheat gluten diet, 1209.
—, dietary, adipose tissue turnover rate in exercised trained rats, 132.
Carnosine, breast muscle, histidine status in the chick, 2055.
—, tissue concentration in gravid swine fed graded levels of histidine, 120.
Casein, amino acid and gelatin supplementation for catfish, 1153.
Cat, biotin deficiency, effects on hepatic propionyl-CoA carboxylase, 330.
—, valine requirement of the growing kitten, 1308.
Cattle, biohydrogenation and availabliity of linoleic acid in lactating cows, 1755.
—, calcium homeostatic mechanisms in the cow, effect of a low calcium prepartal diet, morphologic and chemical studies, 2244.
—, changes in plasma 25-hydroxycholecalciferol and selected blood parameters after injection of massive doses of cholecalciferol or 25-hydroxycholecalciferol in nonlactating dairy cows, 606.
—, gluconeogenesis in ruminants, propionic acid production from a high-grain diet, 2036.
—, milk production, nitrogen utilization and glucose synthesis in lactating cows infused postruminally with sodium caseinate and glucose, 631.
Cebus albifrons, long-term effect of low dietary calcium:phosphate ratio on the skeleton, 834.
Cell division, vitamin A deficiency, effect on intestine of the rat, 552.
Cellular development in chicks, glycine requirement for growth, 1800.
Cellulose, dietary fiber effects on cholesterol metabolism in rats, 466.
—, metabolism of Ca, Mg, Zn, and P by man, effects when fed diets of low and high fiber content, 510.
Central nervous system lesions, vitamin E deficiency in the rat, 1200.
— — —, regional differences in DNA synthesis in embryonic rats due to zinc deficiency, 855.
Ceruloplasmin, indication of a copper deficiency in a subpopulation of Alaskan moose, 1182.
Chelonia mydas, lysine, tryptophan and methionine requirement of the hatchling green sea turtle, 171.
— —, valine, leucine, isoleucine and phenylalanine requirements of the hatchling green sea turtle, 1502.
Chick(s), (see Chicken(s)).
Chicken, amino acid absorption along the intestinal tract of chicks fed heated and raw soybean meal, 1775.
—, ascorbic acid and citric acid effects on calcium metabolism in chickens, 1484.
—, availability of spray dried lard-water protein in rats and chicks, 1022.
—, biomechanical and morphological changes in bone, effect of ethane1-1hydroxy-1,1-diphosphate and dietary fluoride, 1747.
—, brain calcium binding protein and response to cholecalciferol, 480.
—, cholecalciferol and 25-hydroxycholecalciferol relative toxicity and metabolic effects in chicks, 1027.
—, dietary protein, glycine and tryptophan effects on iron metabolism in the chick, 24.
—, differential absorption of endogenous and exogenous cholesterol, effects of dietary oil level and phytosterols, 1996.

—, encephalomalacia of chicks induced by dilauryl succinate, preventive effect of selenium, methionine and antioxidants, 35.
—, glucose kinetics in vitamin A deficient chickens, 1229.
—, glycine requirement for growth and cellular development, 1800.
—, histidine status in the chick as measured by growth rate, plasma free histidine and breast muscle carnosine, 2055.
—, (−)-hydroxycitrate influence on lipogenesis, 112.
—, ketogenicity of soybean oil, coconut oil and their respective fatty acids, 2206.
—, lipoamide dehydrogenase and mitochondrial structure in selenium deficient chicks, 1583.
—, Maillard reaction, nutritional implications, the availability of fructose-phenylalanine, 1659.
—, mediation of calcium adaptation by 1,25-dihydroxycholecalciferol in chicks, 1975.
—, parathyroid gland response to vitamin D metabolites 1,25- and 24,25-dihydroxycholecalciferol, 1918.
—, protein intake, uric acid metabolism and protein efficiency ratio in growing chicks, 959.
—, pyridoxine deficiency and postnatal brain aspartate and alanine aminotransferase activities and cholesterol levels in chicks, 1602.
—, relation between amino acid catabolizing enzymes and free amino acids in liver and plasma in adult cockerels fed diets containing graded levels of protein, 829.
—, relative activities of some metabolites and analogs of cholecalciferol in stimulation of tibia ash weight in rats otherwise deprived of vitamin D, 194.
—, response of adipose tissue lipoprotein lipase to fasting in the chicken and rat, 990.
—, role of estrogen as a cause of fatty liver hemorrhagic syndrome, 873.
—, uric acid metabolism and urinary uric acid excretion in chickens fed a low protein diet, stimulatory effect of intraportal ammonia, 1147.
—, utilization of analogs of riboflavin by riboflavin deficient chick embryos, 245.
—, utilization of high and low eruicic acid rapeseed oils, 251.
Cholecalciferol, (see Vitamin D).
Cholesterol absorption, dietary fat and cholesterol effects in squirrel monkeys, 814.
— —, dietary oil level and phytosterol effects in chicks, 1996.
—, blood levels, studies on control in suckling and weanling rats, 2062.
—, brain development (postnatal) in pyridoxine deficient chicks, 1602.
— dietary, cholesterol synthesis in the castrated goat, 1632.
—, dietary, insulin metabolism, glucose tolerance and in vivo insulin sensitivity in rats, 546.
—, dietary, plant sterol ester effects on absorption, 1139.
—, dietary, tissue lipid peroxidation, glutathione peroxidase activity and liver microsomal function in rat and guinea pigs, 310.
— kinetics, controlling factors in the rabbit, 596.
— metabolism, dietary fiber and salt mixtures, effects in rats, 466.
— — hypocholesterolemic activity of β-sitosterol and β-sitostanol in rats, 2011.
— —, interrelated effects of food lipids in rats, 1444.
—, serum, fluoride and fat effects in guinea pigs, 97.
Choline deficiency, dietary fat influence on fatty livers in rats, 1263.
Chromatin, template properties in rat liver after restricted protein supply, 949.
Chromium induced carbohydrate intolerance in the rat, 1702.
Chymotrypsin activity in the pancreas and small intestinal juice of growing swine, effect of dietary raw soybeans and soybean trypsin inhibitor, 156.
Chymotrypsinogen synthesis (pancreatic) adaptation to changes in diet, 87.
Circadian rhythms, effects of scheduling meal-feeding at different phases in rats, 176.
— —, diurnal changes in plasma and liver lipids and lipoprotein lipase activity in heart and adipose tissue in rats fed a high and low fat diet, 199.
Citric acid, calcium metabolism of chickens, 1484.
Cobalt, biphasic response on rats, 1537.
Coconut oil ketogenicity for the chick, 2206.
Cold tolerance, long-term effects of suboptimal dietary magnesium in rats, 1640.
Colostrum deprived neonatal pig, dietary fat level on growth and lipogenesis, 2100.
Copper deficiency in a subpopulation of Alaskan moose, 1182.
—, dietary, lead toxicity in the young male rat, 143.
—, iron supplementation of the lactation mouse and suckling neonate, 1377.
— metabolism, anemia of lead intoxication, 1779.
Corn, nitrogen retention of young men fed isonitrogenous diets containing normal, opaque-2, or sugary-2 opaque-2 corn, 404.
Coronary artery disease, milk xanthine oxidase, blood lipids and coronary plaques in rabbits, 758.
Corticosteroids, diet composition effects in rats, 1068.
—, influence of vitamin C restriction in guinea pigs, 1846.
Coturnix coturnix japonica, dietary DL-ethionine and/or DL-methionine on egg laying and activities of some cytoplasmic NAD-linked dehydrogenases and NADPH-producing enzymes in liver, 716.
— — —, dietary DL-ethionine effects on egg laying and activities of cytoplasmic and mitochondrial L-glycerol-3-phosphate in liver and kidney, 708.
Crude fat and protein diets, effects on reproduction and weanling growth in 4 strains of inbred mice, 61.
Cyclic AMP and GMP, adaptation to meal-feeding in rats, 746.
— AMP and GMP levels in thymocytes and splenic T and B lymphocytes in protein deprived rats, 1729.
Cyclopropene fatty acids, reproduction and lipid composition of rats, 574.
Cystathionase and cystathionine synthease, in-

fluence of estrogen treatment on liver of female rats fed varying levels of vitamin B_6, 1255.
Cystathionine synthase, cystine effect on methionine metabolism in rats, 1455.
Cystein, dietary, effects on liver glutathione, 51.
Cystine content of legume seed protein, estimation by determination of cystein with 2-vinylquinoline and relation to protein content and activity of cysteine synthase, 2122.
—, methionine metabolism in rats, 1455.
— requirement of channel catfish, 2031.

D

Development, brain calcium binding protein and response to cholecalciferol in the chick, 480.
—, brain enzyme activities, effect of dietary protein levels in rats, 1094.
—, brain, extremely slow turnover in normal rats may explain long-lasting effects of early iron deficiency, 1075.
—, changes in growing rats born to dams restricted in protein and/or energy, 650.
—, control of blood cholesterol levels in suckling and weanling rats, 2062.
—, dietary protein levels, influence on activities of several brain enzymes in the rat, 1102.
—, energy or protein restriction and subsequent rehabilitation effect on DNA and protein content of several organs in rat pups, 2091.
—, geophagia effects on maternal blood and embryonic development in the rat, 2020.
—, maternal and fetal response to various suboptimal levels of zinc intake during gestation in the rat, 1543.
—, neural tissue composition in malnourished perinatal rhesus monkeys, 2228.
—, persistence of dietary suppression of 3-HMG-CoA reductase during development in rats, 1131.
—, protein deficiency, effects on maternal, fetal and placental growth in rats, 973.
—, protein quality and quantity contributions to growth during gestation, lactation and postweaning, 420.
—, protein supplementation effects on the products of conception of rats, 1590.
—, RNA metabolism, malnutrition effect in the maternal liver and fetal tissues at different stages of pregnancy in the rat, 1694.
—, thyroid function in prenatally protein deprived rats, 221.
—, thyroid morphology in the fetal and neonatal rat, effect of prenatal protein deprivation, 213.
—, vitamin A levels in maternal and fetal tissues of hypervitaminotic A rats and rabbits, 1816.
—, zinc deficiency, abnormal prenatal lung development in rats, 862.
—, zinc deficiency effects on protein synthesis in brain and liver of suckling rats, 1082.
—, zinc deficiency, reduced DNA synthesis, regional differences in embryonic rats, 855.
Diabetes, glucose and lipid metabolism of rats fed high sucrose or starch-bran diets, 584.
Digestibility, exclusion of pancreatic exocrine secretion from intestine in the pig existence of digestive compensation, 1216.
Digestive system, zinc deficiency effects on ultrastructure of the pancreatic acinar cell and intestinal epithelium in the rat, 896.
1,25-Dihydroxycholecalciferol and 24,25-dihydroxycholecalciferol, parathyroid glands response in the chick, 1918.
—, mediation of calcium metabolism in chicks, 1975.
Dilauryl succinate induced encephalomalacia in chicks, preventive effects of selenium, methionine and antioxidants, 35.
2,8-Dioxyadenine, effects on growth and metabolism of rats, 1044.
DNA, content of several organs in rat pups, effects of energy or protein deprivation and subsequent rehabilitation, 2091.
— synthesis, zinc deficiency, regional differences in embryonic rats, 855.
Dog, lactate, alanine and serine turnover and incorporation into glucose in the dog, 397.
—, prolong fasting effects on glucose turnover and blood metabolites, 1053.
Dystocia, use of EDTA to produce zinc deficiency in the pregnant rats, 539.
—, zinc deficiency and repletion, effect on parturition in two strains of rats, 1399.

E

EDTA, zinc deficiency in the pregnant rat, 539.
Egg laying, Japanese quail, effect of dietary DL-ethionine, 708.
— —, Japanese quail, effect of dietary DL-ethionine and/or DL-methionine, 716.
Encephalomalicia, chicks induced by dilauryl succinate, preventive effects of selenium, methionine and antioxidants, 35.
Energy, dietary, hemoglobin and hematocrit in the rat, 1016.
— high dietary, embryonic loss and progesterone metabolism in rats, 230.
— intake, amino acid fortification of wheat diets fed at varying levels of energy intake to rats, 289.
— metabolism, energetic efficiencies, a new method, 1724.
— restriction, enzymes of tryptophan-NAD pathway in rats, 2213.
— —, metabolic and developmental changes in growing rats during gestation and lactation, 650.
— —, mild or severe short- and long-term effects on nitrogen metabolism, 1909.
— —, protein and DNA content of several organs in rat pups, 2091.
— utilization, chicks fed diets containing high and low erucic acid rapeseed oils, 251.
— —, genetically obese rats and mice fed a low carbohydrate diet, 320.
Enzyme activities, brain, effect of dietary protein levels during early development in rats, 1094.
— adaptation, pancreatic amylase and chymotrypsinogen adaptation to changes in diet, 87.
—, carbohydrate and lipid metabolism, effects of vitamin B_6 deficiency, 443.
— induction, pyridoxal-phosphate dependent enzymes in vitamin B_6 deficient rats, 235.
Epididymal fat pad, a multifactor analysis of growth in the rat, 1969.

Epithelial cells isolated from rat intestine, stimulation of amino acid transport by fructose, 767.
Epithelium, intestinal, tannic acid and oxidized tannic acid effects in rat, 2113.
Errata, 1582.
Erucic acid rapeseed oils, utilization by the chick, 251.
Erythrocytes, filterability from vitamin E deficient-lead-poisoned rats, 363.
—, free amino acid levels in normal adult volunteers, effect of Aspartame and aspartate loading, 1837.
—, morphology from vitamin E deficienct lead-poisoned rats, 1828.
—, osmotic and peroxidative fragility in vitamin E deficient lead poisoned rats, 373.
—, vitamin E deficient-lead-poisoned rats, effects of oxidants, hydrozenes and amino quinolines, 2135.
Estrogen, cause of fatty liver hemorrhagic syndrome, 873.
— treatment, influence on hepatic cystathionine synthesis and cystathionase of female rats fed varying levels of vitamin B_6, 1255.
Ethane evolution, protection against CCl_4 induced lipid peroxidation in the rat by dietary vitamin E, selenium and methionine, 656.
— -1-hydroxy-1,1-diphosphate, biomechanical and morphological changes in chick bone, 1747.
Ethanol administration, chronic effect on thiamin metabolism in the rat, 2144.
—, chronic intake, dietary composition effect on hepatic lipid accumulation of rats, 1114.
—, dietary, effect on growth, food consumption and body composition of weanling rats, 614.
Ethionine, dietary, egg laying and activities of cytoplasmic mitochondrial L-glycerol-3-phosphate dehydrogenase in liver and kidney of Japanese quail, 708.
—, dietary, egg laying and activities of some cytoplasmic NAD-linked dehydrogenase and NADPH-producing enzymes in liver of Japanese quail, 716.
Exercise, adipose tissue turnover rate, effects of dietary carnitine, 132.
—, voluntary activity in rats, effect of treadmill speeds and slopes, 1981.

F

Faba bean, studies on the isolation of the thermolabile growth inhibitor from faba bean, 1325.
— —, purification, identification and characterization of a growth inhibitor, 1313.
Fasting and subsequent refeeding, metabolic response in the pig, 426.
—, glucagon effects on fatty acid synthesis in refed rats, 942.
—, hepatic lipogenic enzyme activities in coho salmon, 1477.
—, hypoglycemia in experimentally malnourished rats, 383.
—, magnesium deficiency, alkaline phosphatase levels in rats, 1061.
—, prolonged, influence on glucose turnover and blood metabolites in the dog, 1053.
—, response of adipose tissue lipoprotein lipase in the chicken and rat, 990.
— (starvation), muscle protein synthesis in rats, 1244.
Fat deficiency, fatty acid synthesis in testes of rats, 79.
—, dietary, enhancement of iron absorption in iron depleted rats, 1687.
—, dietary, fatty livers on cholene-deficient rats, 1263.
—, dietary, fluoride effects on the serum lipids of guinea pigs, 97.
—, dietary, gastric emptying in rats, 104.
—, dietary, hemoglobin and hematocrit in rats, 1016.
—, dietary induced variations in urinary taurine levels in college women, 673.
—, dietary influence of tocopherols on plasma tocopherols of human subjects, 1006.
—, dietary influence on lipogenic enzyme activities in coho salmon, 846.
—, dietary level, differential absorption of endogenous and exogenous cholesterol in the chick, 1996.
—, dietary level, growth and lipogenesis in the colostrum deprived neonatal pig, 2100.
—, dietary, liver lipid accumulation induced by feeding a protein-repletion diet containing glycerol to protein-depleted rats, 1120.
—, dietary type, cholesterol absorption in squirrel monkeys, 814.
— -free diet, influence of dietary glycerol on serum lipoproteins of rats, 2153.
— -soluble vitamins, hypervitaminosis E effects in rats, 1418.
Fats, dietary, oxidative phosphorylation and fatty acid profile of rat liver mitochondria, 1621.
Fatty acid(s) deficiency, metabolism of γ-linolenic acid in essential fatty acid deficient rats, 519.
— — metabolism, selenium deficient rats and lambs, 1493.
— — oxidation, adipose tissue turnover rate in exercise trained rats, effects of dietary carnitine, 132.
— — profile of rat liver mitochondria, effect of dietary fat, 1621.
— — synthesis, differential effects of dietary methyl esters of long-chain saturated and polyunsaturated fatty acids on rat liver and adipose tissue lipogenesis, 1170.
— — synthesis, glucagon effects in fasted and refed rats, 942.
— — synthesis, hepatic, time sequence of changes in rats meal-fed polyunsaturated fatty acids, 1468.
— — synthesis, (−)-hydroxycitrate influence in chickens and rats, 112.
— — synthesis in testes of fat-deficient and fat-supplemented rats, 79.

—, pyridoxal-phosphate dependent enzyme induction in vitamin B_6 deficient rats, 235.
Glycogen, vitamin A deficiency effects on glucose kinetics in chickens, 1229.
Gluconeogenesis, hypervitaminosis A effects in rat liver, 1809.
—, metabolic response to prolonged fasting and refeeding in the pig, 426.

—, propionic acid production from a high-grain diet fed to cattle, 2036.
Glucose homeostasis, fasting induced hypoglycemia in experimentally malnourished rats, 383.
— incorporation into lipids in rat aorta, effects of meal-feeding on insulin sensitivity, 1896.
— kinetics in vitamin A deficient chickens, 1229.
— metabolism, diet influence on lactate, alanine and serine turnover and incorporation into glucose in the dog, 397.
— —, high sucrose or starch-bran diets fed to rats, 584.
— —, selenium deficient rats and lambs, 1493.
— -6-phosphate dehydrogenase induction, independence from glycogen accumulation in rat liver, 2109.
— -6-phosphate dehydrogenase, liver and adipose tissue response to dietary medium chain and long chain triglycerides, 934.
—, placental transfer in the rat during protein malnutrition, 2006.
— tolerance, cholesterol fed rats, 546.
— tolerance, chromium induced carbohydrate intolerance in the rat, 1702.
— turnover, influence of prolonged fasting in the dog, 1053.
— synthesis, milk production and nitrogen utilization in lactating cows infused postruminally with sodium caseinate and glucose, 631.
— uptake, epididymal adipose tissue, effect of vitamin B_6 deficiency, 443.
— utilization, meal-feeding effects on lipogenic activation by glucose in rats, 502.
Glutathione-insulin transhydrogenase, insulin metabolism and glucose tolerance in cholesterol fed rats, 546.
— peroxidase activity, cholesterol feeding, effects in rats and guinea pigs, 310.
— peroxidase activity, linseed meal fed to chicks, 391.
— peroxidase, selenium and vitamin E deficiency effects in sheep, 1298.
— peroxidase, selenite and selenomethionine effects in the rat, 475.
— peroxidase system in prenecrotic stages of dietary hepatic necrosis in rats, 1852.
— (reduced) possible roles as a reservoir of cysteine, 51.
Glycerol, dietary influence on serum lipoproteins of rats fed a fat-free diet, 2153.
— feeding, liver lipid accumulation induced by feeding a protein-repletion diet containing glycerol to protein-depleted rats, 1120.
L-Glycerol-3-phospate dehydrogenase in cytoplasm and mitochondria in liver and kidney of Japanese quail fed DL-ethionine, 708.
Glycerol, strain specific increase in carbohydrate sensitive BHE rat, 1884.
Glycine, dietary, iron metabolism in the growing chick, 24.
— requirement for growth and cellular development in chicks, 1800.
Glycogen accumulation, independence from glucose-6-phosphate dehydrogenase induction in rat liver, 2109.
Glycolytic activities, leukocytes in ascorbic acid deficient guinea pigs, 1507.
—, —, leukocytes in ascorbic acid deficient guinea pigs, 1513.
Glycosaminoglycan metabolism, vitamin A deficiency effect in guinea pig bone, 2198.
Gnotobiotes, vitamin B_6 deficiency in germ-free rats, 1707.
Goat, dietary cholesterol effect on cholesterol synthesis in the castrated goat, 1632.
Grain diet, gluconeogenesis in ruminants, propionic acid production in cattle, 2036.
Growth, epididymal fat pad, a multifactor analysis in the rat, 1969.
—, ethanol effects in weanling rats, 614.
—, feeding crude fat and crude protein during weaning in 4 strains of inbred mice, 61.
— hormone, diet composition effects in rats, 1068.
— inhibitor, faba bean, purification, identification and characterization, 1313.
— —, faba bean, studies on the isolation of the thermolabil factor, 1325.
Guinea pig(s), calcium and glycosaminoglycan metabolism, effect of vitamin A deficiency in bone, 2198.
— —, cholesterol feeding effects on tissue peroxidation, glutathione peroxidase activity and liver microsomal functions, 310.
— —, fluoride and fat effects on serum lipids, 97.
— —, glycolytic, hexose monophosphate shunt and bactericidal activities of leukocytes in ascorbic acid deficient guinea pigs, 1507.
— —, phagocytosis and leukocyte enzymes in ascorbic acid deficiency, 1513.
— —, vitamin C restriction influence on adrenal calcium and plasma corticosteroids, 1846.
— —, zinc requirement, 1517.

H

Heart, diurnal changes in lipoprotein lipase activity in heart and adipose tissue in rats fed a high and low fat diet, 199.
Hen, (see Chicken).
Hematology, effect of high levels of dietary vitamin E in rats, 1410.
Hemoglobin and hematocrit, effect of dietary protein, fat and energy in the rat, 1016.
— concentration in gravid swine and offspring fed graded levels of histidine, 120.
—, dietary histidine deprivation effects in two rat strains, 2044.
Hepatic, (see Liver).
Hexose monophosphate shunt activities, leukocytes in ascorbic acid deficient guinea pigs, 1507.
— monophosphate shunt activities, leukocytes in ascorbic acid deficient guinea pigs, 1513.
Histidase activity, histidine intake effect on the metabolism of histidine in vivo, 1427.
Histidine deficiency, hemoglobin and tissue concentration of histidine containing dipeptides in two rat strains, 2044.
—, dietary, nitrogen retension in men, 2069.
—, dietary, plasma amino acid and urea concentration of men fed a low nitrogen diet, 2078.
—, dietary requirement of gravid swine, influence on nitrogen metabolism, tissue carnosine concentration and blood chemistry, 120.
— metabolism, histidine intake and hepatic histidase activity in vivo, 1427.
—, $^{15}NH_4Cl$ incorporation in adult man, 621.

— status in the chick as measure by growth rate, plasma free histidine and breast muscle carnosine, 2055.
HMG-CoA reductase, persistence of dietary suppression during development in rats, 1131.
Honey bees, some carbohydrate found in pollen and pollen substitutes are toxic to honey bees, 1859.
Hormone levels, diet composition effects on serum levels of insulin, thyroxine, growth hormone and corticosterone, 1068.
Human, clinical findings and nitrogen utilization in young women on oral contraceptive agents and low zinc intakes, 2219.
—, comparative flatulence activity of beans and bean fractions for man and the rat, 680.
—, dietary fat level and tocopherols on plasma tocopherols, 1006.
—, dietary histidine and arginine effects in young men, 2069.
—, dietary histidine and arginine effects on plasma amino acids and urea concentration of men fed a low nitrogen diet, 2078.
—, incorporation of $^{15}NH_4Cl$ into histidine in adult man, 621.
—, metabolism of Ca, Mg, Zn and P, effects of cellulose added to diets of low and high fiber content, 510.
—, nitrogen retention of young men fed isonitrogenous diets containing normal, opaque-2 or sugary-2 opaque-2 corn, 404.
—, physiological response to foods containing phosphate additives in adult volunteer, 42.
—, plasma and erythrocyte free amino acid levels in normal adult volunteers, effect of Aspartame and aspartate loading, 1837.
—, protein requirements: a long-term metabolic nitrogen balance study in young men to evaluate the 1973 FAO/WHO safe level of egg protein intake, 335.
—, postprondial plasma lysine as an indicator of dietary lysine adequacy in infants, 567.
—, variation in urinary taurine levels induced by diet, 673.
—, zinc excretion in young women on low zinc intakes and oral contraceptive agents, 1610.
Hydrogen production, comparative flatulence activity of beans and bean fractions for man and the rat, 680.
25-Hydroxycholecalciferol, plasma, changes after massive doses of cholecalciferol or 25-hydroxycholecalciferol in non-lactating dairy cows, 606.
—, relative toxicity and metabolic effects in chicks, 1027.
3-Hydroxy-3-methylglutaryl coenzyme-A reductase (hepatic) of rats fed semipurified and stock diets, 453.
p-Hydroxyphenylpyruvic acid, threonine supplementation effect on tyrosine toxicity in the rat, 1575.
Hydrozenes, vitamin E deficient-lead-poisoned rats, effect on the filterability of erythrocytes, 2135.
Hyperlipidemia, strain specific increase in blood glycerol level in carbohydrate-sensitive BHE rats, 1884.
Hypervitaminosis A, gluconeogenic activity and amino acid metabolizing enzymes of rat liver, 1809.
— —, maternal and fetal vitamin A levels in tissues of rats and rabbits, 1816.
Hypoglycemia, fasting induced in experimentally malnourished rats, 383.

I

Ictalurus punctatus, amino acid utilization and lysine requirement of fingerling channel catfish, effect of dietary pH, 166.
—, dietary lipid, protein and environmental temperature effects on growth, feed conversion and body composition of channel catfish, 272.
—, L-methionine and L-cystine requirement of channel catfish, 2031.
Immunity, zinc deficiency effects in young adult A/J mice, 1889.
myo-Inositol deficiency, characterization of the lactation-dependent fatty liver in rats, 1871.
Insulin, adaptation to meal-feeding in rats, 746.
—, diet composition effects in rats, 1068.
—, fatty acid synthesis in fasted and refed rats, 942.
— metabolism, (concentration, insulin release and degradation) glucose tolerance and in vivo insulin sensitivity in cholesterol fed rats, 546.
— sensitivity and adipose tissue weight of rats fed starch or sucrose diets ad libitum or in meals, 147.
— sensitivity and incorporation of [U-^{14}C]glucose into lipids in rat aorta, effect of meal-feeding, 1896.
—, serum level of rats meal-fed a high fructose diet, 534.
Intestine, absorption of thiamin, site and extent in the rat, 353.
—, alkaline phosphatase levels in fed and fasted magnesium deficient rats, 1061.
—, amino acid absorption in epithelial cells in rats, stimulation by fructose, 767.
—, amino acid absorption of chicks fed raw and heated soybean meal, 1775.
—, carbohydrate absorption in young of protein-deficient rats, 690.
—, cell proliferation in the rat, effect of vitamin A deficiency, 552.
—, comparative flatulence activity of beans and bean fractions for man and the rat, 680.
—, comparison of feeding refined and unrefined starch diets on hepatic lipogenic enzymes in the rat, 2171.
—, digesta movement and sites of acid production in the rock hydrax, 1954.
—, digestive compensation, exclusion of pancreatic exocrine secretion from the intestine in the pig, 1216.
—, epithelium, tannic acid and oxidized tannic acid effects in rat, 2113.
—, epithelium ultrastructure, effect of zinc deficiency in rats, 896.
—, iron absorption in the neonatal piglet, 487.
—, pyridoxine hydrochloride uptake by the rat jejunal mucosa in vitro, 126.
—, transport of triglyceride in the zinc deficient rat, 909.
—, trypsin and chymotrypsin activities of growing swine, effect of dietary raw soybeans and soybean trypsin inhibitor, 156.

Iron absorption in iron depleted rats by increasing dietary fat, 1687.
— binding substances in the intestinal mucosa of neonatal piglets, 487.
— deficiency, NADH-FMN oxidoreductase activity and iron content of organs from riboflavin deficient rats, 739.
— metabolism, dietary protein, glycine and tryptophan effects in the growing chick, 24.
— —, rat brain, long-lasting effects of early iron deficiency, 1075.
—, spleen levels, effects of excess dietary methionine and N-acetyl-methionine in growing rats, 357.
— supplementation of the lactating mouse and suckling neonates, 1377.
Isoleucine, branched-chain amino acid antagonism in the rat, 887.
Isoleucine requirement of the hatchling green sea turtle, 1502.

J

James Boyd Allison, a biographical sketch, 701.
Jejunum, uptake of pyridoxine hydrochloride in vitro, 126.

K

Keratinization, copper deficiency in a subpopulation of Alaskan Moose, 1182.
Keto acids, branched-chain amino acid antagonism in the rat, effects on tissue amino acid and keto acid concentrations, 887.
— acids (α-ketoisovaleric, α-ketoisocaproic and α-keto-β-methylvaleric acid), effect on hepatic branched-chain α-keto acid dehydrogenase in the rat, 1528.
Ketogenesis, diurnal changes in plasma and liver lipids and lipoprotein lipase activity in heart and adipose tissue in rats fed a high and low fat diet, 199.
—, response to medium-chain triglyceride load in the rat, 1863.
—, soybean oil, coconut oil and their respective fatty acids for the chick, 2206.
Ketosis, influence of prolonged fasting on glucose turnover and blood metabolites in the dog, 1053.
Kidney, arginine formation, effect of arginine-devoid diets in chronically uremic rats, 495.
—, cell cytomegaly and calcification, biological effects of feeding graded levels of lysinoalanine in rats, 1190.
—, dietary protein, adenine and allopurinol effects on growth and metabolism of rats, 1044.
— enzymes, carbohydrate and lipid metabolism and glucose uptake by rat epididymal adipose tissue, effect of vitamin B_6 deficiency, 443.
—, L-glycerol-3-phosphate dehydrogenase, effect of dietary ethionine, 708.
— metallothionein, zinc accumulation and depletion in rats, 805.
Koalin ingestion, pregnancy, effect on maternal blood and embryonic development in rats, 2020.
Kynurenine pathway, effect of vitamin B_6 deficiency and tryptophan loading on urinary excretion of tryptophan metabolites in mammals, 261.
Kyphoscoleosis, vitamin E deficiency (prolonged) in the rat, 1200.

L

Lactate dehydrogenase activity, buccal epithelium of zinc deficient rats, 724.
— turnover and incorporation into glucose, influence of diet in dogs, 397.
Lactation, amino acid fortification of bread fed at varying energy levels during gestation and lactation in rats, 300.
—, biohydrogenation and availability of linoleic acid in cows, 1755.

— -feeding, insulin sensitivity and adipose tissue weight of rats fed starch or sucrose diets, 147.
— -feeding, insulin sensitivity and incorporation of [$U^{14}C$]glucose into lipids in rat aorta, 1896.
— -feeding, lipogenic enzyme activities of rats fed a high fructose diet, 534.
— -feeding polyunsaturated fatty acids, time sequence of changes in hepatic fatty acid synthesis in rats, 1468.
— -feeding, sychronization of rhythmic variables to meal timing in rats, 176.
Medium-chain triglyceride load, ketogenic response in the rat, 1863.
Membrane transport, pyridoxine hydrochloride uptake by the rat jejunal mucosa in vitro, 126.
Metabolic adaptation, 1,25-dihydroxycholecalciferol mediation of calcium adaptation in chicks, 1975.
— —, energy utilization of a low carbohydrate diet fed to genetically obese rats and mice, 320.
— —, fasting induced hypoglycemia in experimentally malnourished rats, 383.
— —, influence of prolonged fasting on glucose turnover and blood metabolites in the dog, 1053.
— —, meal-feeding at different phases of the circadian system, effect in rats, 176.
— —, prolonged fasting and subsequent refeeding in the pig, 426.
— —, vitamin B_6 deficiency, effects on liver, kidney and adipose tissue enzymes associated with carbohydrate metabolism and on glucose uptake by epididymal adipose tissue, 443.
Metallothionein, accumulation and depletion of zinc in rat liver and kidney, 805.
—, role of dietary calcium and calcium binding protein in cadmium toxicity in rats, 92.
— synthesis, zinc metabolism in rats, 965.
Methionine and threonine supplementation of a protein-free diet, effect on urinary excretion of nitrogen and tissue free amino acids, 783.
—, dietary, egg laying and activities of some cytoplasmic NAD-linked dehydrogenases and NADPH-producing enzymes in liver of Japanese quail, 716.
L-Methionine, dietary excess, effect on growing rats, 357.
Methionine, dietary, protection against lipid peroxidation induced by carbon tetrachloride as measured by ethane evolution in rats, 656.
—, encephalomalacia of chicks induced by dilauryl succinate, preventive effects against, 35.
— formation from α-amino-n-butyric acid and 5′methylthioadenosine in the rat, 1927.
— metabolism, cystine effects in rats, 1455.
— —, significance of formate as an intermediate

in the oxidation of the methionine, S-methyl-L-cysteine and sarcosine methyl carbons to CO_2 in the rat, 1665.
— requirement, channel catfish, 2031.
— —, hatchling green sea turtle, 171.
Methyl esters of long-chain saturated and polyunsaturated fatty acids, differential effect on rat liver and adipose tissue lipogenesis, 1170.
— -group metabolism, oxidation to CO_2 in the rat, significance of formate as an intermediate, 1665.
5'Methylthioadenosine, methionine formation in the rat, 1927.
Mestranol, effect on folacin depletion and repletion in rats, 1157.
Mice, food intake, body weight gain and body composition of the young obese mouse, 1715.
—, genetic influence on zinc metabolism, 1683.
—, genetically obese, energy utilization of a low carbohydrate diet, 320.
—, iron supplementation of the lactating mouse and suckling neonate, 1377.
—, reproduction and weanling growth in 4 strains of inbred mice, effect of feeding crude fat and crude protein, 61.
—, tissue lipofuscin pigment concentration, effect of dietary vitamin E and aging, 1792.
—, zinc deficiency, immune response of the young adult A/J mouse, 1889.
Microsomal enzymes, cholesterol feeding effects on tissue lipid peroxidation, glutathione peroxidase activity and liver microsomal functions in rats and guinea pigs, 310.
— hemoproteins, effect of selenium and vitamin E deficiency, 998.
— lipoperoxidation in prenecrotic stages of dietary hepatic necrosis in rats, 1852.
Milk production, nitrogen utilization and glucose synthesis in lactating cows infused postruminally with sodium caseinate and glucose, 631.
— xanthine oxidase, blood lipid and coronary plaques in rabbits, 758.
Mitochondria, hepatic, effect of dietary fats on oxidative phosphorylation and fatty acids, 1621.
—, oxygen consumption and distribution in cardiac and red and white skeletal muscle of rats, effects of dietary protein or food restriction, 525.
—, respiration, effect of selenium and vitamin E deficiency, 998.
—, structure and lipoamide dehydrogenase in selenium-deficient chicks, 1583.
Monkey, baboons, sparing effect of folic acid on the development of vitamin B_{12} deficiency, 1822.
— (squirrel), cholesterol absorption rats, effect of type of dietary fat and cholesterol, 814.
—, long-term effect of low dietary calcium:phosphate ratio on the skeleton, 834.
—, neural tissue composition, effects of perinatal malnutrition in rhesus monkeys, 2228.
—, vitamin E deficiency, accumulation of orthochromatophilic normoblasts in bone marrow, 2026.
—, xylitol associated changes in amylase and protein content of parotid salivia, 1763.
Moose, copper deficiency in a subpopulation of Alaskan moose, 1182.
Muscle, breast, histidine status in the chick, 2055.
— phosphorylase in rats fed high levels of vitamin B_6, 1962.
— protein oxidative deterioration during nutritional muscular dystrophy in chicks, 1786.
—, protein restriction or food restriction effects on oxygen consumption and mitochondrial distribution in cardiac and red and white skeletal muscle of rats, 525.
— protein synthesis in fasted rats, 1244.

N

NAD-linked dehydrogenases and NADPH producing enzymes, effect of dietary DL-ethionine and/or DL-methionine in liver of Japanese quail, 716.
NADH-FMN oxidoreductase activity and iron content of organs from riboflavin and iron deficient rats, 739.
Neural tissue composition, effects of perinatal malnutrition in rhesus monkeys, 2228.
Nibbling, nitrogen balance and body composition of rats, influence of diet composition, 1768.
Nitrogen balance, diet composition influence in meal-eating and nibbling rats, 1768.
— —, study in young men to evaluate the 1973 FAO/WHO safe level of egg protein intake, 335.
—, dietary, histidine and arginine effects on plasma amino acid and urea concentration of men, 2078.
— metabolism, effect of dietary protein level on urea synthesis of isolated rat hepatocytes, 561.
— —, short- and long-term effects of feeding protein during mild or severe energy restriction, 1909.
— —, tissue carnosine concentration and blood chemistry of gravid swine fed graded levels of histidine, 120.
— retention, dietary histidine and arginine effects in young men, 2067.
— —, isonitrogenous diets containing normal, opaque-2 or sugary-2 opaque-2 corn fed to young men, 404.
— sparing action, methionine and threonine supplementation of a protein-free diet, effect of urinary excretion of nitrogen and tissue free amino acids, 783.
— utilization, clinical findings in young women on low zinc intakes and oral contraceptive agents, 2219.
— —, milk production and glucose synthesis in lactating cows infused postruminally with sodium caseinate and glucose, 631.
Norethindrone, effect on folacin depletion and repletion in rats, 1157.
Nucleic acid synthesis, magnesium deficiency effects in vivo, 2178.
Nutritional muscular dystrophy, oxidative deterioration of the muscle proteins in chicks, 1786.

O

Obesity, energy utilization of low carbohydrate diet fed genetically obese rats and mice, 320.
—, food intake, body weight gain and body composition of the young obese mouse, 1715.
—, ketogenesis, response to medium-chain triglyceride load in the rat, 1863.
—, meal-feeding effects on lipogenic activation by glucose in rats, 502.

Oncohynshus kisutch (walbaum), hepatic lipogenic enzyme activities, effects of fasting and feeding various diets in coho salmon, 1477.
Oncorhynchus kisutch (walbaum), fatty acid synthesis, influence of diet in coho salmon, 1677.
— — (walbaum), influence of dietary lipid on lipogenic activities in coho salmon, 846.
Opaque-2 corn, nitrogen retention of young men fed isonitrogenous diets containing normal, opaque-2 or sugary-2 opaque-2 corn, 404.
Oral contraceptive agents, clinical findings and nitrogen utilization in young women on oral contraceptive agents and low zinc intakes, 2026.
— — —, estrogen treatment influence on hepatic cystathionine synthase and cystathionase of female rats fed varying levels of vitamin B_6, 1255.
— — —, noretindrone and mestranol, effect on folacin depletion and repletion in rats, 1157.
— — —, zinc excretion in young women on low zinc intakes, 1610.
— epithelium, (Buccal), increased lactate dehydrogenase activity in zinc deficient rats, 724.
Orange juice, characterization of food binding of vitamin B_6, 2128.
Orthochromatophilic normoblasts, accumulation in bone marrow of vitamin E deficient monkeys, 2026.
Oxalate formation in xylitol infused rabbits, 792.
— formation, pyridoxine or thiamin deficient rats during xylitol infusion, 458.
— acid, availability of zinc from spinach leaves and zinc sulfate to rats, 929.
Oxidants, vitamin E deficient-lead-poisoned rats, effects on the filterability of erythrocytes, 2135.
Oxidase activity, zinc deficiency influence in rat liver and testes, 2189.
Oxidative phosphorylation and fatty acid profile or rat liver mitochondria, effect of dietary fats, 1621.
Oxygen consumption and mitochondrial distribution in cardiac and red and white skeletal muscle, effects of protein or food restriction, 525.

P

Pancreas, acinar cell ultrastructure, effect of zinc deficiency in rats, 896.
—, adaptation of amylase and chymotrypsinogen to changes in diet, 87.
—, enzymes, dietary amino acids, casein and soybean trypsin inhibitor on pancreatic protein secretion in rats, 281.
—, exclusion of exocrine secretion from intestine in the pig, existence of digestive compensation, 1216.
—, protein-energy malnutrition, effects in young rats, 1235.
—, protein synthesis in rats fed soybean flour, 1985.
—, trypsin and chymotrypsin activities of growing swine, effect of dietary raw soybeans and soybean trypsin inhibitors, 156.
Parakeratosis, buccal epithelium of zinc deficient rats, 724.
Parathyroid glands, response to vitamin D metabolites, 1,25-dihydroxycholecalciferol and 24,25-dihydroxycholecalciferol in chick, 1918.
Parotid gland, protein-energy malnutrition, effects in young rats, 1235.
Parturition, EDTA use to produce zinc deficiency in the pregnant rat, 539.
—, zinc deficiency and aspirin toxicity, analogous effects in the pregnant rat, 1222.
—, zinc deficiency and zinc repletion during pregnancy in two strains of rats, 1399.
Pectin, dietary fiber effects on cholesterol metabolism in rats, 466.
Peptidyl transferase activity in rat skeletal muscle ribosomes after protein restriction, 1335.
Peroxidative fragility, erythrocytes from vitamin E deficient lead poisoned rats, 373.
pH, effect of amino acid utilization of fingerling channel catfish, 166.
Phagocytosis and leukocyte enzymes in ascorbic acid deficient guinea pigs, 1513.
Phenobarbital administration, hepatic polyribosomes and protein synthesis in rats force-fed a complete or threonine devoid diet, 730.
Phenylalanine requirement of the hatchling green sea turtle, 1502.
Phosphate food additives, physiological response of human adults, 42.
Phospholipids, abnormal prenatal lung development resulting from maternal zinc deficiency in rats, 862.
Phosphorus, long-term effect of low dietary calcium: phosphate ratio of skeleton of monkeys, 834.
— metabolism, cellulose added to diets of high and low fiber content fed to man, 510.
—, plasma, changes after injection of massive doses of cholecalciferol or 25-hydroxycholecalciferol in non-lactating cows, 606.
Phytosterol, differential absorption of endogenous and exogenous cholesterol in the chick, 1996.
Pig, dietary fat level effect on growth and lipogenesis in the colostrum deprived neonatal pig, 2100.
—, exclusion of pancreatic exocrine secretion from the intestine, existence of a digestive compensation, 1216.
—, iron binding substances in the intestinal mucosa of the neonatal piglet, 487.
—, lysine and tryptophan, determination of the optimum dietary proportions based on growth, food intake and plasma metabolites, 1369.
—, metabolic response to prolonged fasting and refeeding, 426.
—, nitrogen metabolism, tissue carnosine concentration and blood chemistry of gravid swine fed graded levels of histidine, 120.
Placenta, protein deficiency, pair-feeding or diet supplementation, effects of growth in rats, 973.
Placental transfer, α-amino isobutyric acid, maternal and fetal exchange during protein malnutrition in the rat, 2002.
— —, glucose and a non-metabolizable glucose analog, maternal-fetal exchange during protein malnutrition, 2006.
Plant steroids, interrelated effects of food lipids on cholesterol metabolism in rats, 1444.
— sterol ester, effect on the absorption of dietary cholesterol, 1139.
Plasma amino acids, postprandial plasma lysine as an indicator of dietary lysine adequacy in infants, 567.

— — —, influence of prolonged fasting on glucose turnover and blood metabolites in the dog, 1053.
— — —, relation between amino acid catabolizing enzymes and free amino acids in liver and plasma in adult cockerels fed diets containing graded levels of protein, 829.
— cholesterol concentration, controlling factors in the rabbit, 596.
— —, control studies in suckling and weanling rats, 2062.
— fatty acids, diurnal changes in lipoprotein lipase activity in heart and adipose tissue in rats fed a high and low fat diet, 199.
— histidine, histidine status in the chick, 2055.
— isotope ratio method, cholesterol absorption in squirrel monkeys, type of dietary fat and cholesterol, 814.
— lipids, hypervitaminosis E, effect in rats, 1418.
— metabolites, lysine and tryptophan, determination of the optimum dietary proportions for growing pigs based on growth and food intake, 1369.
— —, lysine and tryptophan, optimum dietary proportions for growing rats based on growth and food intake, 1361.
— tocopherols, influence of dietary fat level and dietary tocopherols in human subjects, 1006.
— triglycerides, (−)-hydroxycitrate influence on lipogenesis in chickens and rats, 112.
— —, lipid and glucose metabolism of normal and diabetic rats, effects of high sucrose or starch-bran diets, 584.
— uric acid, stimulatory effect of intraportal ammonia in chickens fed a low protein diet, 1147.
Plasmalogens (arterial), milk xanthine oxidase, blood lipids and coronary plaques in rabbits, 758.
Pollen, some carbohydrate found in pollen and pollen substitutes are toxic to honey bees, 1859.
Polyribosomes, force-feeding a complete or threonine devoid diet, effects of tryptophan or phenobarbital administration in rats, 730.
Polyunsaturated fatty acids, mammary tumors induced in rats by 7,12 dimethylbenz(α)anthracene, effect of safflower oil high in oleic or linoleic acid, 1353.
— — —, time sequence of changes in hepatic fatty acid synthesis in meal-fed rats, 1468.
Potassium requirement of the growing rat, 1394.
Pregnancy, EDTA use to produce zinc deficiency in the rat, 539.
—, geophagia, effects on maternal blood and embryonic development in the rat, 2020.
—, nitrogen metabolism, tissue carnosine concentration and blood chemistry of gravid swine fed graded levels of histidine, 120.
—, protein deficiency, pair-feeding or diet supplementation, effects on maternal, fetal and placental growth in rats, 973.
—, protein supplementation of rats, 1590.
—, RNA metabolism in maternal and fetal tissues, effect of malnutrition, 1694.
—, vitamin E levels in maternal and fetal tissues of hypervitaminotic A rats and rabbits, 1816.
—, zinc deficiency and aspirin toxicity, analogous effects in the rat, 1222.
—, zinc deficiency and zinc repletion in two strains of rats, 1399.
Primate, (see Monkey or Human).
Proceedings of the Forty-First Annual Meeting of the American Institute of Nutrition, 1555.
Progesterone metabolism, factor of embryonic loss in rats fed high energy diets with varying levels of protein, 230.
Propionic acid production from a high-grain diet fed to cattle, gluconeogenesis in ruminants, 2036.
Propionyl-CoA carboxylase, hepatic, effect of biotin deficiency in cats, 330.
Prostaglandin, zinc deficiency and aspirin toxicity, analogous effects in the pregnant rat, 1222.
Protein, adenine and allopurinol, dietary effects on growth and metabolism of rats, 1044.
— availability, spray dried lard-water protein in rats and chicks, 1022.
— content of legume seeds, determination of cysteine with 2-vinylquinoline, and relation to activity of cysteine synthase, 2122.
— content of monkey parotid salivia, xylitol associated changes, 1763.
— deficiency, absorption in young or protein-deficient rats, 690.
— —, cyclic AMP and GMP levels in thymocytes and splenic T and B lymphocytes in rats, 1729.
— —, iron metabolism in the growing chick, 24.
— —, long-term, effects on rat liver ribosome cycle, 1035.
— —, maternal-fetal exchange of α-amino isobutyric acid in the rat, 2002.
— —, maternal-fetal exchange of glucose and a non-metabolizable glucose analog, 2006.
— —, metabolic and developmental changes in growing rats during gestation and lactation, 650.
— —, oxygen consumption and mitochondrial distribution of cardiac and red and white skeletal muscle of rats, 525.
— —, pair-feeding of diet supplementation, effect on maternal, fetal and placental growth in rats, 973.
— —, peptidyl transferase activity in rat skeletal muscle ribosomes, 1335.
— —, prenatal, effect on fetal and neonatal thyroid morphology in rats, 213.
— —, prenatal, thyroid function in rats, 221.
— —, protein and DNA content of several organs in rat pups, 2091.
— —, template properties of rat liver chromatin, transcription by homologous RNA polymerase I and II, 949.
—, dietary, growth, feed conversion and body composition of channel catfish, 272.
—, dietary, hemoglobin and hematocrit in rats, 1016.
—, dietary level, effect on urea synthesis in isolated rat hepatocytes, 561.
—, dietary level, influence on rat brain enzyme activities during early development, 1094.
—, dietary level, influence on rat brain enzyme activities during early development, 1102.
—, dietary level, relation between liver amino acid catabolizing enzymes and free amino acids of liver and plasma in adult cockerels, 829.
—, dietary level, relationship between embryonic loss and progesterone metabolism in rats fed high energy diets, 230.
—, dietary, short- and long-term effects on nitro-

gen metabolism during mild or severe energy restriction, 1909.
—, dietary, stimulatory effect of intraportal ammonia on plasma uric acid concentration and urinary uric acid excretion in chickens, 1147.
— -energy malnutrition, effects in young rats upon subsequent protein utilization, 412.
— -energy malnutrition, fasting induced hypoglycemia in experimentally malnourished rats, 383.
— -energy malnutrition, growth of mandible and long-bone of newborn male and female rats, 983.
— -energy malnutrition, parotid gland and pancreas of young rats, 1235.
— intake, uric acid metabolism and protein efficiency ratio in growing chicks, 959.
— kinase, adaptation to meal-feeding in rats, 746.
— metabolism in liver of rats deprived of tryptophan, 1737.
— quality, amino acid fortification of bread fed at varying energy levels during gestation and lactation, 300.
— —, amino acid fortification of wheat diets fed at varying levels of energy intake to rats, 289.
— —, nitrogen retention of young men fed normal, opaque-2 or sugary-2 opaque-2 corn, 404.
— —, uric acid metabolism and protein intake in growing chicks, 959.
— repletion, effect of dietary fats and fatty acids on liver lipid accumulation induced by feeding glycerol, 1120.
— requirement, comparative contributions to growth during gestation, lactation and postweaning in rats, 420.
— —, human, a long-term metabolic nitrogen balance study in young men to evaluate the 1973 FAO/WHO safe level of egg protein intake, 335.
— supplementation effects on the products of conception of rats, 1590.
— synthesis, dietary glycine requirement for growth and cellular development in chicks, 1800.
— —, feeding soybean flour effects on the rat pancreas, 1985.
— — in brain and liver of suckling rats, effects of zinc deficiency, 1082.
— —, liver, role of glutathione, 51.
— —, magnesium deficiency, effects in vivo, 2178.
— —, pancrease, enzymatic adaptation to changes in diet, 87.
— —, tryptophan or phenobarbital administration effects in rats force-fed a complete or threonine devoid diet, 730.
— utilization, different postnatal periods of protein-energy malnutrition in young rats, 412.
— utilization of mechanically deboned meat by growing rats, 1947.
Pyridoxal-phosphate dependent enzymes, induction in vitamin B_6 deficient rats, 235.
Pyridoxine, (see Vitamin B_6).

Q

Quail, Japanese, dietary DL-ethionine and/or methionine effect on egg laying and activities of some cytoplasmic NAD-linked dehydrogenases and NADPH producing enzymes in liver, 716.
—, (Japanese), dietary DL-ethionine effects on egg laying and activities of cytoplasmic and mitochondrial L-glycerol-3-phosphate dehydrogenase in liver and kidney, 708.

R

Rabbit, controlling factors in the maintenance of plasma cholesterol concentration, 596.
—, fetal and maternal vitamin A levels in tissues of hypervitaminotic A rats and rabbits, 1816.
—, milk xanthine oxidase, blood lipids and coronary plaques, 758.
—, xylitol infusion and oxalate formation, 792.
Rapeseed oil, utilization by the chick, 251.
Reproduction, amino acid fortification of bread fed at varying energy levels during gestation and lactation in rats, 300.
—, crude fat and crude protein diet effects in 4 strains of inbred mice, 61.
—, cyclopropene fatty acids fed to rats, 574.
—, embryonic loss and progesterone metabolism in rats fed a high energy diet, 230.
—, metabolic and developmental changes in growing rats born to dams restricted in protein and/or energy during gestation and lactation, 650.
—, protein quality and quantity contributions to growth during gestation, lactation and postweaning, 420.
—, selenium and vitamin E deficiency effects in sheep fed purified diets, 1288.
Resorption-gestation test, biological activity of vitamin E compounds and chemical determination on the vitamin E activity in foods and feeds, 2236.
Retinal reductase, influence of zinc deficiency in rat liver and testes, 2189.
Retinoic acid maintained rats, rate of metabolism of retinol after a single dose of radioactive retinol, 70.
Retinol, (see Vitamin A).
Riboflavin analogs, utilization in riboflavin deficient chick embryo, 245.
— deficiency, NADH-FMN oxidoreductase activity and iron content of organs from iron deficient rats, 739.
— homologues, utilization by D-amino acid oxidase and xanthine oxidase, 645.
— metabolites in the urine of rats, 1269.
Ribonucleic acid polymerase I and II, template properties of rat liver chromatin after restricted protein supply, 949.
Ribosomal peptidyl transferase activity in rat skeletal muscle after protein restriction, 1335.
RNA metabolism, hepatic, tryptophan deprived rats, 1737.
— —, malnutrition effects in the maternal liver and fetal tissues at different stages of pregnancy in the rat, 1694.
— synthesis, protein deficiency effects in rat liver, 1035.
Rock hydrax, patterns of digest movement and site of acid production, 1954.
Rumen bypass, milk production, nitrogen utilization and glucose synthesis in lactating cows in-

fused postruminally with sodium caseinate and glucose, 631.
Ruminants, gluconeogenesis, propionic acid production from a high-grain diet fed to cattle, 2036.

S

Safflower oil, high in oleic or linoleic acid, effect on mammary tumors induced in rats by 7,12-dimethylbenz(α) anthracene, 1353.
— —, interrelated effects on steroid metabolism in rats, 1444.
Salivia, xylitol associated changes in amylase and protein content in monkey, 1763.
Salt mixtures, effects on cholesterol metabolism in rats, 466.
Sarcosine metabolism, oxidation of the methyl carbons to CO_2 significance of formate as an intermediate in the rat, 1665.
Selenium accumulation, hepatic, in chicks as affected by a factor in linseed meal, 391.
— and vitamin E deficiency, blood selenium levels, tissue glutathione peroxidase activities and white muscle disease in sheep, 1298.
— and Vitamin E deficiency, hepatic microsomal hemoproteins and microchondrial respiration in lambs, 998.
— and vitamin E deficiency, reproduction, blood components and tissue lesions in sheep fed purified diets, 1288.
— deficiency, changes of lipoamide dehydrogenase and mitochondrial structure in chicks, 1583.
— —, fatty acid and glucose metabolism in rats and lambs, 1493.
— —, glutathione peroxidase system and microsomal lipoperoxidation in prenecrotic stages of dietary hepatic necrosis in rats, 1852.
— —, lipid peroxidation in vivo in the rat as monitored by ethane evolution, 666.
— —, vitamin E effects in lead-poisoned rats, 378.
—, dietary, protection agains lipid peroxidation induced by carbon tetrachloride as measured by ethane evolution in rats, 656.
—, encephalomalacia of chicks induced by dilauryl succinate, preventive effects against, 35.
—, selenite and selanomethionine, effects on glutathione peroxidase in the rat, 475.
Selenosis, hepatic selenium accumulation and plasma glutathione peroxidase activity in linseed meal, 391.
Sensory factors which affect the acceptance of raw and heated defatted soybeans by rats, 1653.
Serine metabolism, metabolic changes in growing rats born to dams restricted in protein and/or energy, 650.
— turnover and incorporation into glucose, influence of diet in dogs, 397.
Serotonin (brain) metabolism and plasma tryptophan levels in chronically uremic rats, 840.
Sex difference, effect of protein-energy malnutrition on the growth of mandible and long-bone in newborn rats, 983.
— hormones, mast cell population of skin and bone marrow in magnesium deprived rats, 2164.
Sheep, selenium and vitamin E deficiency effects on blood selenium levels, tissue glutathione peroxidase and white muscle disease, 1298.
—, selenium deficiency effects on fatty acid and glucose metabolism in rats and lambs, 1493.
—, selenium and vitamin E deficiency, effects on hepatic microsomal hemoproteins and mitochondrial respiration in lambs, 998.
—, selenium and vitamin E deficiency effects on reproduction, blood components and tissue lesions, 1288.
β-Sitostanol, hypocholesterolemic activity in rats, 2011.
—, absorption of dietary cholesterol, 1139.
—, hypocholesterolemic activity in rats, 2011.
Skeletal muscle ribosomal peptidyl transferase activity in rats after protein restriction, 1335.
Skin, mast cell populations in magnesium deprived rats, influence of sex hormones, 2164.
Soybean flour, protein synthesis pattern of the rat pancreas, 1985.
— meal, amino acid absorption along the intestinal tract of chicks fed heated and raw soybean meal, 1775.
— oil ketogenicity for the chick, 2206.
— sensory factors which affect the acceptance of raw and heated defatted soybeans by rats, 1653.
— trypsin inhibitor and raw soybeans, effects on trypsin and chymotrypsin activities in the pancreas and in small intestinal juice of growing swine, 156.
— trypsin inhibitor, effect on pancreatic protein secretion in rats, 281.
Species difference, adipose tissue lipoprotein response to fasting in the chicken and rat, 990.
Spinach, zinc availability effects of oxalic acid in rats, 929.
Spleen, hypertrophy and iron levels, effects of excess dietary L-methionine and N-acetyl-methionine in growing rats, 357.
—, T and B lymphocytes, cyclic AMP and GMP levels in protein deprived rats, 1729.
Starch-bran, glucose and lipid metabolism of normal and diabetic rats fed high sucrose or starch-bran diets, 584.
—, insulin sensitivity and adipose tissue weight of rats fed ad libitum or in meals, 147.
—, refined and unrefined, effects on intestinal uptake and hepatic lipogenic enzymes in the rat, 2171.
Steroid contraceptives, norethindrone and mestranol, effect on folacin depletion and repletion, 1157.
— metabolism, interrelated effects of food lipids in rats, 1444.
Sterol metabolism, hypocholesterolemic activity of β-sitosterol and β-sitostanol in rats, 2011.
Stigmasterol, absorption of dietary cholesterol, 1139.
Strain difference, dietary histidine deprivation effects on hemoglobin and tissue concentration of histidine containing dipeptides in rats, 2044.
— —, zinc deficiency and zinc repletion during pregnancy, effect on parturition, 1399.
Sucrose, dietary, insulin sensitivity and adipose tissue weight of rats fed ad libitum or in meals, 147.
—, glucose and lipid metabolism of normal and diabetic rats fed high sucrose or starch bran diets, 584.
Sulfur amino acid requirement, L-methionine and L-cystine in channel catfish, 2031.

— containing amino acids, oxidative deterioration of the muscle proteins during nutritional muscular dystrophy in chicks, 1786.
Sunset yellow FCF(FD&C Yellow No. 6), effects of diet on growth and survival in rats fed toxic levels, 822.
Swine, (see Pig).

T

Tannic acid and oxidized tannic acid, effect on the functional state of rat intestinal epithelium, 2113.
Tartrazine (FD&C yellow No. 5), effects of diet on growth and survival in rats fed toxic levels, 822.
Taste acuity, zinc deficiency effects upon fluid intake in the rat, 436.
Taurine, urinary levels, dietary induced variations in college women, 673.
Temperature, environmental, growth, feed conversion and body composition in channel catfish, 272.
Template properties of rat liver chromatin after restricted protein supply, transcription by homologous RNA polymerase I and II, 949.
Testes, fatty acid synthesis of fat-deficient and fat-supplemented rats, 79.
—, zinc deficiency influence on retinal reductase and oxidase activities in rat, 2189.
Thiamin absorption, site and extent in the rat, 353.
— deficiency, acetylcholine levels and utilization in vivo in rat brain, 1902.
— —, oxalate formation in rats during xylitol infusion, 458.
— —, oxythiamin treated rabbits and oxalate formation due to xylitol infusion, 792.
— metabolism, chronic ethanol administration, effect in the rat, 2144.
— — in vitamin B_6 or vitamin B_{12} deficient rats, 775.
Threonine and methionine supplemenation of a protein-free diet, effect on urinary excretion of nitrogen and tissue free amino acids in rats, 783.
— deficiency, hepatic polyribosomes and protein synthesis in rats after administration of tryptophan or phenobarbital, 730.
— dehydratase, threonine supplementation effects on tyrosine toxicity in the rat, 1575.
— supplementation, tyrosine toxicity in the rat, 1575.
Thryoxine, diet composition effects in rats, 1068.
Thymocytes, cyclic AMP asand GMP levels in protein deprived rats, 1729.
Thymus, zinc deficiency, immune response of the young adult A/J mouse, 1889.
Thyroid, cobalt, a biphasic response on rats, 1537.
— function in prenatally protein deprived rats, 221.
— morphology, fetal and neonatal, prenatal protein deprivation in rats, 213.
Tocopherol, (see Vitamin E).
Toxicity, cholecalciferol and 25-hydroxycholecalciferol in chicks, 1027.
—, lead, anemia, a role for copper, 1779.
—, lead, osmotic and peroxidative fragility of erythrocytes from vitamin E deficient rats, 373.
—, lead, selenium and vitamin E, comparative effects in rats, 378.
—, lead, vitamin E deficient rats, effects on erythrocyte filterability, 363.
—, morphology of erythrocytes from vitamin E lead-poisoned rats, 1828.
—, some carbohydrate found in pollen and pollen substitutes are toxic to honey bees, 1859.
—, tartrazine and sunset yellow fed to rats, effect on growth and survival, 822.
—, vitamin E, hematological indices and biochemical parameters in rats, 1410.
—, vitamin E, liver and plasma lipids and fat soluble vitamins in rats, 1418.
—, zinc-thionein in rats, synthesis and metabolism, 965.
Trace minerals, cobalt, a biphasic response on rats, 1537.
— — interaction, dietary copper influence of lead toxicity in the young male rat, 143.
Transcription, efficiency, template properties of rat liver chromatin after restricted protein supply, 949.
Treadmill speeds and slopes, effect on voluntary exercise in rats, 1981.
Triglyceride absorption, zinc deficiency effects on intestinal transport in rats, 909.
—, dietary, medium and long chain, response of glucose-6-phosphate and malic enzyme in rat liver and adipose tissue, 934.
— load, medium-chain, ketogenic response in the rat, 1863.
Triglycerides, serum, dietary fluoride and fat effects in guinea pigs, 97.
Trypsin and chymotrypsin activities in the pancreas and small intestinal juice of growing swine, effect of dietary raw soybean and soybean trypsin inhibitor, 156.
— inhibitor, pancreatic protein secretion in rats, 281.
Tryptophan administration, hepatic polyribosomes and protein synthesis in rats force-fed a complete or threonine devoid diet, 730.
— and lysine, determination of the optimum dietary proportions for growing pigs based on growth, food intake and plasma metabolites, 1369.
— — —, determination of the optimum dietary proportions for growing rats based on growth, food intake and plasma metabolites, 1361.
— deficiency, metabolism of protein and RNA in the liver of rats, 1737.
—, dietary, iron metabolism in the growing chick, 24.
— levels (plasma), brain serotonin metabolism in chronically uremic rats, 840.
— metabolism, effects of vitamin B_6 deficiency in mammals, 261.
— -NAD pathway enzymes, effect of diet restriction in rats, 2213.
— requirement hatchling green sea turtle, 171.
Turtle, quantitative requirements of the hatchling green sea turtle for lysine, tryptophan and methionine, 171.
—, valine, leucien isoleucine and phenylalanine requirements of the hatchling green sea turtle, 1502.

Tyrosine toxicity, threonine supplementation effect in the rat, 1575.
— transaminase, threonien supplementation effects on tyrosine toxicity in the rat, 1575.

U

Urea cycle, effect of dietary protein level in isolated rat hepatocytes, 561.
—, plasma, dietary histidine and arginine effects in men fed a low nitrogen diet, 2078.
Uremia, arginine-devoid diet effects in chronically uremic rats, 495.
—, plasma tryptophan levels and brain serotonin metabolism in rats, 840.
Uric acid metabolism and protein efficiency ratio in growing chicks, 959.
— — —, stimulatory effect of intraportal ammonia on plasma uric acid concentration and urinary uric acid excretion in chickens fed a low protein diet, 1147.
Urinary excretion, δ-aminolevulinic acid influence of dietary copper on lead toxicity in the young male rat, 143.
— —, nitrogen, methionine and threonine supplementation of a protein-free diet, effect on tissue free amino acids in rats, 783.
— —, tryptophan metabolism in mammals, effect of vitamin B_6 deficiency and tryptophan loading, 261.
— —, vitamin A metabolism in retinoic acid maintained rats after a single dose of radioactive retinol, 70.
— —, zinc accumulation and depletion in liver and kidney metallothioneins, 805.
— riboflavin metabolites in rats, 1269.
— taurine levels, dietary induced variations in college women, 673.
— uric acid, stimulatory effect of intraportal ammonia in chickens fed a low protein diet, 1147.
Uterus, protein deficiency, effects on maternal, fetal and placental growth in rats, 973.

V

Valine, branched-chain amino acid antagonism in the rat, 887.
— requirement of the growing kitten, 1308.
— requirement of the hatchling green sea turtle, 1502.
Vicia faba L. var minor, purification, identification and characterization of a growth inhibitor in faba beans, 1313.
— faba L. var minor, studies on the isolation of the thermolabile growth inhibitor form faba bean, 1325.
2-Vinlyquinoline, cystine content of legume seed proteins, estimation by determination of cysteine, and relation to protein content and activity of cysteine synthase, 2122.
Vitamin A deficiency, calcium and glycosaminoglycan metabolism in guinea pig bone, 2198.
— — —, glucose kinetics in chickens, 1229.
— — —, intestinal cell proliferation in the rat, 552.
— — hypervitaminosis A effects on gluconeogenic activity and amino acid metabolizing enzymes in rat liver, 1809.
— — levels in tissues of hypervitaminotic A rats and rabbits, 1816.
— — metabolism, rate of metabolism of retinol in retinoic acid maintained rats after a single dose ot radioactive retinol, 70.
— B_6 deficiency, 4-deoxypyridoxine treated rabbits, oxalate formation due to xylitol infusion, 792.
— — deficiency, enzymes associated with carbohydrate and lipid metabolism and on glucose uptake by epididymal adipose tissue, 443.
— — deficiency in germ-free rats, 1707.
— — deficiency, induction of pyridoxal-phosphate dependent enzymes in rats, 235.
— — deficiency, thiamin metabolism in rats, 775.
— — dietary, estrogen treatment, influence on hepatic cystathionine synthase and cystathionase of female rats, 1255.
— — dietary, muscle phosphorylase in rats, 1962.
— —, food-binding, characterization in orange juice, 2128.
— — deficiency, oxalate formation in rats during xylitol infusion, 458.
— — deficiency, postnatal development of brain aspartate and alanine aminotransferase activities and cholesterol levels in chicks, 1602.
— — uptake by the rat jejunal mucosa in vitro, 126.
— — deficiency, urinary excretion of tryptophan metabolism in mammals, 261.
— B_{12} deficiency, sparing effect of folic acid deficiency in baboons fed a vitamin B_{12} deficient diet, 1822.
— — deficiency, thiamin metabolism in rats, 775.
— C, calcium metabolism of chickens, 1484.
— — deficiency, glycolytic, hexomonophosphate shunt and bactericidal activities of leukocytes in guinea pigs, 1507.
— — deficiency, phagocytosis and leukocyte enzymes in ascorbic acid deficient guinea pigs, 1513.
— —, encephalomalicia in chicks induced by dilauryl succinate, preventive effects against, 35.
— — restriction, adrenal calcium and plasma corticosteroids in guinea pigs, 1846.
— D metabolites and analogs, relative activities in stimulation of tibia ash weight in chicks otherwise deprived of vitamin D, 194.
— —, brain calcium binding protein and response to cholecalciferol in chick, 480.
— —, changes in plasma 25-hydroxycholecalciferol and selected blood parameters after injection of massive doses of cholecalciferol or 25-hydroxycholecalciferol in non-lactating dairy cows, 606.
— — metabolites, 1,25-dihydroxycholecalciferol mediation of calcium adaptation in chicks, 1975.
— — metabolites, parpthyroid gland response to 1,25-dihydroxycholecalciferol and 24,25-dihydroxycholecalciferol in the chick, 1918.
— —, relative toxicity and metabolic effects of cholecalciferol and 25-hydroxycholecalciferol in chicks, 1027.
— E and selenium deficiency, blood selenium levels, tissue glutathione peroxidase activities and white muscle disease in sheep, 1298.
— — and selenium deficiency hepatic microsomal hemoproteins and mitochondrial respiration in lambs, 998.

——and selenium deficiency, reproduction, blood components and tissue lesions in sheep fed purified diets, 1288.
——compounds, biological activity by the resorption-gestation test and chemical determination on the vitamin E activity in foods and feeds, 2236.
——deficiency, accumulation of orthochromatophilic normoblasts in bone marrow of monkeys, 2026.
——deficiency, encephalomalacia of chicks induced by dilauryl succinate, preventive effects of selenium, methionine and antioxidants, 35.
—E deficiency, erythrocyte filterability in lead-poisoned rats, 363.
——deficiency, glutathione peroxidase system and microsomal lipoperoxidation in prenecrotic stages of dietary hepatic necrosis in rats, 1852.
——, dietary, influence of dietary fat level on plasma tocopherols of human subjects, 1006.
——deficiency, lead-poisoned rats, effect of oxidants, hydrozenes and amino quinolines on the filterability of erythrocytes, 2135.
——deficiency, lipid peroxidation in vivo in the rat as monitored by ethane evolution, 666.
——deficiency, morphology of erythrocytes from lead-poisoned rats, 1828.
——deficiency, osmotic and peroxidative fragility of erythrocytes from lead poisoned rats, 373.
——deficiency, oxidative deterioration of muscle proteins during nutritional muscular dystrophy, 1786.
——deficiency, prolonged effects in rats, 1200.
——deficiency, selenium effects in lead-poisoned rats, 378.
——, dietary, protection against lipid peroxidation induced by carbon tetrachloride as measured by ethane evolution in rats, 656.
——, dietary, tissue lipofuscin pigment concentration in mice, 1792.
——, high dietary levels, hematological indices and biochemical parameters in rats, 1410.
——, high dietary levels, liver and plasma lipids and fat soluble vitamins in rats, 1418.
Voluntary activity, cardiovascular and muscle response to anemic in rats, 1595.
—activity, treadmill speeds and slope effects in rats, 1981.

W

Wheat, amino acid fortification, diets fed at varying levels of energy intake to rats, 289.
—diets, lipid accumulation in rats, 1385.
—-gluten diet, lysine and carnitine deficiency in male and female rats, 1209.
White muscle disease, selenium and vitamin E deficiency effects of tissue glutathione peroxidase activities and blood selenium levels in sheep, 1298.
———, selenium and vitamin E deficiency in sheep fed purified diets, 1288.
William Prout, a biographical sketch, 15.

X

Xanthine oxidase, blood lipids and coronary plaques in rabbits, 758.
——, utilization of riboflavin homologues, 645.
Xylitol associated changes in amylase and protein content of monley parotid salivia, 1763.
—infusion and oxalate formation in rabbits, 792.
——, oxalate formation in pyridoxine or thiamin deficient rats, 458.

Z

Zinc availability from spinach leaves and zinc sulfate, effects of oxalic acid in rats, 929.
—accumulation and depletion in rat liver and kidney metallothioneins, 805.
—deficiency, abnormal prenatal lung development in rats, 862.
——, aspirin toxicity, analogous effects in the pregnant rats, 1222.
——, clinical findings and nitrogen utilization in young women on oral contraceptive agents, 2219.
——during pregnancy, effects on parturition in two strains of rats, 1399.
——, EDTA used to produce zinc deficiency in the pregnant rat, 539.
——, fluid intake in the rat, 436.
——, immune response of the young adult A/J mouse, 1889.
——, increases lactate dehydrogenase activity of buccal epithelium, 724.
——, intestinal transport of triglycerides in the rat, 909.
——, maternal and fetal response to various suboptimal levels during gestation in the rat, 1543.
——, protein synthesis in brain and liver of suckling rats, 1082.
——, reduced DNA synthesis, regional differences in embryonic rats, 855.
——, retinol reductase and oxidase activities in rat liver and testes, 2189.
——, ultrastructure of the pancreatic acinar cell and intestinal epithelium in the rat, 896.
—excretion in young women on low zinc intakes and oral contraceptive agents, 1610.
—metabolism, cellulose added to diets of high and low fiber content fed to man, 510.
——, genetic influence in mice, 1683.
——, synthesis of zinc-thionein in rats, 965.
—requirement of the young guinea pig, 1517.

No. 1 JANUARY 1977

Guide for Authors 1

Nomenclature Policy: Generic Descriptors and Trivial Names for Vitamins and Related Compounds 7

William Prout—A Biographical Sketch. *Richard Ahrens* 15

Effects of Dietary Protein, Glycine, and Tryptophan on Iron Metabolism in the Growing Chick. *Adnan Mouhamad-Ali Miski and F. H. Kratzer* 24

Preventive Effect of Selenium, Methionine and Antioxidants against Encephalomalacia of Chicks Induced by Dilauryl Succinate. *Minoru Yoshida and Hiroshi Hoshii* 35

Physiological Responses of Human Adults to Foods Containing Phosphate Additives. *R. Raines Bell, H. H. Draper, D. Y. M. Tzeng, H. K. Shin and G. R. Schmidt* 42

Rat Liver Glutathione: Possible Role as a Reservoir of Cysteine. *Noriko Tateishi Taneaki Higashi, Akiko Naruse, Kayoko Nakashima, Hiroshi Shiozake and Yukiya Sakamoto* 51

Effect of Crude Fat and Crude Protein on Reproduction and Weanling Growth in Four Strains of Inbred Mice. *Joseph J. Knapka, Kitty P. Smith and Francis J. Judge* 61

Rate of Metabolism of Retinol in Retinoic Acid Maintained Rats After a Single Dose of Radioactive Retinol. *P. Ramnathan Sundaresan* 70

Fatty Acid Synthesis in Testes of Fat-Deficient and Fat-Supplemented Rats. *A Richard Whorton and John G. Coniglio* 79

Adaptation of Rat Pancreatic Amylase and Chymotrypsinogen to Changes in Diet. *Abiodun Johnson, Ruth Hurwitz and Norman Kretchmer* 87

Effect of Fluoride on the Serum Lipids of Guinea Pigs. *DeWayne Townsend and Leon Singer* 97

Dietary Influences on Gastric Emptying of Carbohydrate Versus Fat in the Rat. *David L. Trout, Emily S. Conway and John D. Putney* 104

Influence of (−)-Hydroxycitrate on Lipogenesis in Chickens and Rats. *Hoja Chee, Dale R. Romsos and Gilbert A. Leveille* 112

Nitrogen Metabolism, Tissue Carnosine Concentration and Blood Chemistry of Gravid Swine Fed Graded Levels of Histidine. *Robert A. Easter and David H. Baker* 120

Uptake of Pyridoxine Hydrochloride by the Rat Jejunal Mucosa In Vitro. *Henry M. Middleton, III* 126

Dietary Carnitine and Adipose Tissue Turnover Rate in Exercise Trained Rats. *E. Wayne Askew, Arthur L. Hecker and William R. Wise, Jr.* 132

Influence of Dietary Copper on Lead Toxicity in the Young Male Rat. *Florian L. Cerklewski and Richard M. Forbes* 143

Insulin Sensitivity and Adipose Tissue Weight of Rats Fed Starch or Sucrose Diets Ad Libitum or in Meals. *Sheldon Reiser and Judith Hallfrisch* 147

Effect of Dietary Raw Soybean and Soybean Trypsin Inhibitor on Trypsin and Chymotrypsin Activities in the Pancreas and in Small Intestinal Juice of Growing Swine. *Jong Tseng Yen, Aldon H. Jensen and Joseph Simon* 156

Effect of Dietary pH on Amino Acid Utilization and the Lysine Requirement of Fingerling Channel Catfish. *Robert P. Wilson, Dwight E. Harding and Donald L. Garling, Jr.* 166

No. 2 FEBRUARY 1977

Quantitative Requirements of the Hatchling Green Sea Turtle for Lysine, Tryptophan, and Methionine. *James R. Wood and Fern E. Wood* 171

Effects of the Scheduling of Meal-Feeding at Different Phases of the Circadian System in Rats. *Karel M. H. Philippens, Heinz von Mayersbach and Lawrence E. Scheving* .. 176

Relative Activities of Some Metabolites and Analogs of Cholecalciferol in Stimulation of Tibia Ash Weight in Chicks Otherwise Deprived of Vitamin D. *Alfred Boris, James F. Hurley and Thelma Trmal* 194

Diurnal Changes in Plasma and Liver Lipids and Lipoprotein Lipase Activity in Heart and Adipose Tissue in Rats Fed a High and Low Fat Diet. *P. De Gasquet, S. Griglio, E. Pequignot-Planche and M. I. Malewiak* 199

Effect of Prenatal protein Deprivation on Fetal and Neonatal Thyroid Morphology in the Rat. *Ruth E. Shrader, Mary M. Hastings-Roberts, Millie I. Ferlatte and Frances J. Zeman* 213

Thyroid Function in Prenatally Protein-Deprived Rats. *Ruth E. Shrader, Millie I. Ferlatte, Mary H. Hastings-Roberts, Bonnie M. Schoenborne, Cherryl A. Hoernicke and Frances J. Zeman* 221

Embryonic Loss and Progesterone Metabolism in Rats Fed a High Energy Diet. *Mamoru Saitoh and Seiya Takahashi* 230

Induction of Pyridoxal Phosphate-Dependent Enzymes in Vitamin B-6 Deficient Rats. *J. Edward Hunter and Alfred E. Harper* 235

Utilization of Analogues of Riboflavin by the Riboflavin-Deficient Chick Embryo. *John P. Lambooy and Clyne S. Shaffner* 245

Studies of the Utilization of High and Low Erucic Acid Rapeseed Oils by the Chick. *Helen Clement and Ruth Renner* 251

Effects of Vitamin B-6 Deficiency and Tryptophan Loading on Urinary Excretion of Tryptophan Metabolites in Mammals. *James K. Yeh and Raymond R. Brown* 261

Effects of Dietary Lipids, Dietary Protein and Environmental Temperatures on Growth, Feed Conversion and Body Composition of Channel Catfish. *Morgan W. Murray, James W. Andrews and Helen L. DeLoach* 272

Effect of Dietary Amino Acids, Casein, and Soybean Trypsin Inhibior on Pancreatic Protein Secretion in Rats. *Barbara Olds Schneeman, Ingrid Chang, Linda B. Smith and R. L. Lyman* 281

Amino Acid Fortification of Wheat Diets Fed at Varying Levels of Energy Intake to Rats. *G. R. Jansen and D. T. Verburg* 289

Amino Acid Fortification of Bread Fed at Varying Energy Levels During Gestation and Lactation in Rats. *G. R. Jansen and W. C. Monte* 300

Effect of Cholesterol Feeding on Tissue Lipid Peroxidation, Glutathione Peroxidase Activity and Liver Microsomal Functions in Rats and Guinea Pigs. *Alan C. Tsai, Geesje M. Thie and C. R.-s. Lin* 310

Energy Utilization of a Low Carbohydrate Diet Fed Genetically Obese Rats and Mice. *Shirley W. Thenen and Jean Mayer* 320

Biotin Deficiency in the Cat and the Effect on Hepatic Propionyl CoA Carboxylase. *Claudia J. Carey and James G. Morris* 330

Human Protein Requirements: A Long-Term Metabolic Nitrogen Balance Study in Young Men to Evaluate the 1973 FAO/WHO Safe Level of Egg Protein Intake. *Cutberto Garza, Nevin S. Scrimshaw and Vernon R. Young* 335

No. 3 MARCH 1977

Site and Extent of Thiamin Absorption in the Rat. *D. Sklan and Naomi Trostler* 353

Effects of Excess Dietary L-Methionine and N-Acetyl-L-Methionine on Growing Rats. *John T. Rotruck and Robert W. Boggs* 357

Filterability of Erythrocytes from Vitamin E-deficient Lead-poisoned Rats. *Orville A. Levander, Virginia C. Morris and Renato J. Ferretti* 363

Osmotic and Peroxidative Fragilities of Erythrocytes from Vitamin E-deficient Lead-poisoned Rats. *Orville A. Levander, Renato J. Ferretti and Virginia C. Morris* 373

Comparative Effects of Selenium and Vitamin E in Lead-poisoned Rats. *Orville A. Levander, Virginia C. Morris and Renato J. Ferretti* 378

Fasting-Induced Hypoglycemia in Experimentally Malnourished Rats. *Raul A. Wapnir and Fima Lifshitz* 383

Selenosis, Hepatic Selenium Accumulation, and Plasma Glutathione Peroxidase Activity in Chicks as Affected by a Factor in Linseed Meal. *Leo S. Jensen, Dennis B. Werho and Donald E. Leyden* 391

Influence of Diet on Lactate, Alanine and Serine Turnover and Incorporation into Glucose in the Dog. *Panfilo S. Belo, Dale R. Romsos and Gilbert A. Leveille* 397

Nitrogen Retention of Young Men who Consumed Isonitrogenous Diets Containing Normal, *Opaque-2* or *Sugary-2 Opaque-2* Corn. *Helen E. Clark, David V. Glover, Jennie L. Betz and Lynn B. Bailey* 404

Effect of Different Postnatal Periods of Protein-Energy Malnutrition in Young Rats upon Subsequent Protein Utilization. *Richard H. Barnes and Eva Kwong* 412

Comparative Contributions of Dietary Protein Quality and Quantity to Growth during Gestation, Lactation and Posweaning in the Rat. *Eva Kwong and Richard H. Barnes* 420

Metabolic Responses to Prolonged Fasting and Subsequent Refeeding in the Pig. *George J. Klain, Francis J. Sullivan, Kenneth S. K. Chinn, John P. Hannon and Lloyd D. Jones* 426

Effects of a Zinc Deficient Diet upon Fluid Intake in the Rat. *Frank Catalanotto and Peter Lacy* 436

Effects of Vitamin B_6 Deficiency on Liver, Kidney, and Adipose Tissue Enzymes Associated with Carbohydrate and Lipid Metabolism, and on Glucose Uptake by Rat Epididymal Adipose Tissue. *Judy D. Ribaya and Stanley N. Gershoff* 443

Hepatic 3-Hydroxy-3-Methylglutaryl Coenzyme-A Reductase of Rats Fed Semipurified and Stock Diets. *Raymond Reiser, Glen R. Henderson, Barbara C. O'Brien and James Thomas* 453

Formation of Oxalate in Pyridoxine or Thiamin Deficient Rats During Intravenous Xylitol Infusions. *B. Hannett, D. W. Thomas, A. H. Chalmers, A. M. Rofe, J. B. Edwards and R. G. Edwards* 458

Effects of Dietary Fiber and Salt Mixtures on the Cholesterol Metabolism of Rats. *D. Mathé, C. Lutton, J. Rautureau, T. Coste, E. Gouffier, J. C. Sulpice and F. Chevallier* 466

Effects of Selenite and Selenomethionine on Glutathione Peroxidase in the Rat. *Stuart Pierce and Al L. Tappel* 475

Chick Brain Calcium Binding Protein: Response to Cholecalciferol and Some Developmental Aspects. *Alan N. Taylor* 480

Iron Binding Substances in the Intestinal Mucosa of Neonatal Piglets. *Kou Furugouri* 487

No. 4 APRIL 1977

Effects of Arginine-Devoid Diets in Chronically Uremic Rats. *Marian Wang, Joel D. Kopple and Marian E. Swendseid* 495

Re-Evaluation of Effects of Meal Feeding on Lipogenic Activation by Glucose in Rats. *D. L. Palmquist, D. B. Learn and N. Baker* 502

Effect of Cellulose Added to Diets of Low and High Fiber Content Upon the Metabolism of Calcium, Magnesium, Zinc and Phosphorus by Man. *Faramarz Ismail-Beigi, John G. Reinhold, Bahram Faraji and Parichehr Abadi* 510

Metabolism of Gamma-Linolenic Acid in Essential Fatty Acid-Deficient Rats. *Ahmed G. Hassam, John P. W. Rivers and Michael A. Crawford* 519

Effect of Dietary Protein Restriction or Food Restriction on Oxygen Consumption and Mitochondrial Distribution in Cardiac and Red and White Skeletal Muscle of Rats. *Fay M. Hansen-Smith, Michael G. Maksud and Diane L. Van Horn* 525

Effect of a High Fructose Diet on Lipogenic Enzyme Activities of Meal-Fed Rats. *Yohko Sugawa-Katayama and Nobuko Morita* 534

Use of EDTA to Produce Zinc Deficiency in the Pregnant Rat. *Jean Apgar* 539

Serum Insulin Concentration, Insulin Release and Degradation, Glucose Tolerance and In Vivo Insulin Sensitivity in Cholesterol-Fed Rats. *Alan C. Tsai* 546

Effect of Vitamin A Deficiency on Intestinal Cell Proliferation in the Rat. *Maija Zile, Elizabeth C. Bunge and Hector F. DeLuca* 552

Effect of Dietary Protein Level on Urea Synthesis in Isolated Rat Hepatocytes. *Stephanie Briggs and R. A. Freedland* 561

Postprandial Plasma Lysine as an Indicator of Dietary Lysine Adequacy in Infants. *William C. MacLean, Jr., Robert P. Placko and George G. Graham* 567

Reproduction and Lipid Composition of Rats Fed Cyclopropene Fatty Acids. *Joseph E. Nixon, Tom A. Eisele, Jerry D. Hendricks and Russell O. Sinnhuber* 574

Effects of High Sucrose or Starch-bran Diets on Glucose and Lipid Metabolism of Normal and Diabetic Rats. *Wen-Ju Lin and James W. Anderson* 584

Controlling Factors in the Maintenance of Plasma Cholesterol Concentration in the Rabbit. *Ellen R. Massaro and Donald B. Zilversmit* 596

Changes in Plasma 25-Hydroxycholecalciferol and Selected Blood Parameters after Injection of Massive Doses of Cholecalciferol or 25-Hydroxycholecalciferol in Non-Lactating Dairy Cows. *Bruce W. Hollis, H. Russell Conrad and John W. Hibbs* .. 606

Effects of Ethanol on Growth, Consumption of Food, and Body Composition of Weanling Rats. *RoseAnn L. Shorey, Patti A. Terranella and William Shive* 614

Incorporation of $^{15}NH_4Cl$ into Histidine in Adult Man. *Yung-Boo Sheng, Thomas M. Badger, J. Malcolm Asplund and Robert L. Wixom* 621

Milk Production, Nitrogen Utilization and Glucose Synthesis in Lactating Cows Infused Postruminally with Sodium Caseinate and Glucose. *Jimmy H. Clark, Howard R. Spires, Robert G. Derrig and Maurice R. Bennink* 631

Utilization of Riboflavin Homologues by D-Amino Acid Oxidase and Xanthine Oxidase. *Joseph J. Domdrowski, Robert D. Faulkner and John P. Lambooy* 645

Metabolic and Development Changes in Growing Rats Born to Dams Restricted in Protein and/or Energy Intake. *Mokhtar T. Atallah, Irma S. Barbeau and Peter L. Pellett* 650

Protection Against Carbon Tetrachloride-Induced Lipid Peroxidation in the Rat by Dietary Vitamin E, Selenium, and Methionine as Measured by Ethane Evolution. *Dean G. Hafeman and William G. Hoekstra* 656

Lipid Peroxidation In Vivo during Vitamin E and Selenium Deficiency in the Rat as Monitored by Ethane Evolution. *Dean G. Hafeman and William G. Hoekstra* ... 666

Dietary-Induced Variations in Urinary Taurine Levels of College Women. *Dorothy E. Thompson and Virginia M. Vivian* 673

Comparative Flatulence Activity of Beans and Bean Fractions for Man and the Rat. *J. R. Wagner, J. F. Carson, R. Becker, M. R. Gumbmann and I. E. Danhof* 680

Carbohydrate Absorption in the Young of Protein-Deficient Rats. *Frances J. Zeman and Marilyn L. Fratzke* 690

No. 5 MAY 1977

James Boyd Allison—A Biographical Sketch. *James W. Green* 701

Effect of Dietary DL-Ethionine on Egg Laying and Activities of Cytoplasmic and Mitochondrial L-Glycerol 3-Phosphate Dehydrogenases in Liver and Kidney of Japanese Quail, *Coturnix coturnix japonica. Masahiro Yamada* 708

Effect of Dietary DL-Ethionine and/or DL-Methionine on Egg Laying and Activities of Some Cytoplasmic NAD Linked-Dehydrogenases and NADPH-Producing Enzymes in Liver of Japanese Quail,*Coturnix coturnix japonica. Masahiro Yamada* 716

Increased Lactate Dehydrogenase Activity in Buccal Epithelium of Zinc-Deficient Rats. *Stanley J. Gerson and Julia Meyer* 724

Effect of Tryptophan or Phenobarbital Administration on Hepatic Polyribosome and Protein Synthesis in Rats Force-Fed a Complete or Threonine-Devoid Diet. *Herschel Sidransky and Ethel Verney* 730

NADH-FMN Oxidoreductase Activity and Iron Content of Organs from Riboflavin- and Iron-Deficient Rats. *Somjai Sirivech, Judy Driskell and Earl Frieden* 739

Effect of Adaptation to Meal-Feeding on Insulin, Glucagon and the Cyclic Nucleotide-Protein Kinase System in Rats. *Margot M. Ip, Clement Ip, Helen M. Tepperman and Jay Tepperman* 746

Bovine Milk Xanthine Oxidase, Blood Lipids and Coronary Plaques in Rabbits. *Charles Y. Ho and Andrew J. Clifford* 758

Stimulation of Neutral Amino Acid Transport by Fructose in Epithelial Cells Isolated from Rat Intestine. *Sheldon Reiser and Judith Hallfrisch* 767

Thiamin Metabolism in Vitamin B_6 or Vitamin B_{12} Deficient Rats. *Kosuke Nishino and Yoshinori Itokawa* 775

Effect of Supplementation of Methionine and Threonine to a Protein Free Diet on Urinary Excretion of Nitrogen and Tissue Free Amino Acids in Rats. *Hidehiko Yokogoshi, Kazutoshi Hayase and Akira Yoshida* 783

Xylitol Infusion and Oxalate Formation in Rabbits. *R. Joan Oshinsky, Yeu-Ming Wang and Jan van Eys* 792

Accumulation and Depletion of Zinc in Rat Liver and Kidney Metallothioneins. *R. W. Chen, E. J. Vasey and P. D. Whanger* 805

Effect of Type of Dietary Fat and Cholesterol on Cholesterol Absorption Rate in Squirrel Monkeys. *Naomi Tanaka and Oscar W. Portman* 814

Effects of Diet on Growth and Survival of Rats Fed Toxic Levels of Tartrazine (FD&C Yellow No. 5) and Sunset Yellow FCF (FD&C Yellow No. 6). *Benjamin H. Ershoff* 822

Relation Between Liver Amino Acid-Catabolizing Enzymes and Free Amino Acids of Liver and Plasma in Adult Cockerels Fed Diets Containing Graded Levels of Protein. *Takuo Ohno and Iwao Tasaki* 829

Long-Term Effect of Low Dietary Calcium: Phosphate Ratio on the Skeleton of *Cebus albifrons* Monkeys. *Marilyn P. Anderson, Ronald D. Hunt, Harry J. Griffiths, Kim W. McIntyre and Robert E. Zimmerman* 834

Plasma Tryptophan Levels and Brain Serotonin Metabolism in Chronically Uremic Rats. *Feridoun Siassi, Marian Wang, Joel D. Kopple and Marian E. Swendseid* 840

Influence of Dietary Lipid on Lipogenic Enzyme Activities in Coho Salmon, *Oncorhynchus kisutch* (Walbaum). *Huangsheng Lin, Dale R. Rosmos, Peter I. Tack and Gilbert A. Leveille* 846

Reduced DNA Synthesis in Zinc Deficiency: Regional Differences in Embryonic Rats. *Curtis D. Eckhert and Lucille S. Hurley* 855

Abnormal Prenatal Lung Development Resulting from Maternal Zinc Deficiency in Rats. *Christine Vojnik and Lucille S. Hurley* 862

Role of Estogen as a Cause of Fatty Liver Hemorrhagic Syndrome. *D. Polin and J. H. Wolford* 873

Effects of Branched-Chain Amino Acid Antagonism in the Rat on Tissue Amino Acid and Keto Acid Concentrations. *Fred L. Shinnick and Alfred E. Harper* 887

Effect of Zinc Deficiency on the Ultrastructure of the Pancreatic Acinar Cell and Intestinal Epithelium in the Rat. *Sung I. Koo and D. E. Turk* 896

Effect of Zinc Deficiency on Intestinal Transport of Triglyceride in the Rat. *Sung I. Koo and D. E. Turk* 909

Role of Dietary Calcium and Calcium Binding Protein in Cadmium Toxicity in Rats. *Philip W. Washko and Robert J. Cousins* 920

No. 6 JUNE 1977

Effects of Oxalic Acid on Availability of Zinc from Spinach Leaves and Zinc Sulfate to Rats. *Ross M. Welch, William A. House and Darrell Van Campen* 929
Response of Glucose-6-Phosphate Dehydrogenase and Malic Enzyme in Rat Liver and Adipose Tissue to Dietary Medium and Long Chain Triglycerides. *Charlotte Slayton Nace and Bela Szepesi* 934
In Vivo Effects of Glucagon on Fatty Acid Synthesis in Fasted and Refed Rats. *George J. Klain* 942
Template Properties of Rat Liver Chromatin After Restricted Protein Supply; Transcription by Homologous Ribonucleic Acid Polymerase I and II. *Alexandra von der Decken and G. Marianne Andersson* 949
Protein Intake, Uric Acid Metabolism and Protein Efficiency Ratio in Growing Chicks. *P. Hevia and A. J. Clifford* 959
Studies on the Synthesis and Metabolism of Zinc-Thionein in Rats. *M. George Cherian* 965
Effects of Protein Deficiency, Pair-Feeding, or Diet Supplementation on Maternal, Fatal and Placental Growth. *Mary M. Hastings-Roberts and Frances J. Zeman* 973
Effect of Protein-Energy Malnutrition on the Growth of Mandible and Long Bone in Newborn Male and Female Rats. *Tetsuo Nakamoto and Sanford A. Miller* 983
Response of Adipose Tissue Lipoprotein Lipase to Fasting in the Chicken and the Rat—A Species Difference. *J. D. Benson and Andre Bensadoun* 990
Effects of Selenium and Vitamin E Deficiencies in Lambs on Hepatic Microsomal Hemoproteins and Mitochondrial Respiration. *P. D. Whanger, M. J. Tripp and P. H. Weswig* 998
Influence of Dietary Fat Level and Dietary Tocopherols on Plasma Tocopherols of Human Subjects *Joanna Lehmann, Mary W. Marshall, Hal T. Slover and James M. Iacono* 1006
Effects of Dietary Protein, Fat and Energy on Blood Hemoglobin and Hematocrit in the Rat. *Joseph C. Edozein and Boyd R. Switzer* 1016
Nutritional Availability of Spray Dried Lard Water Protein. *L. Q. Thong, B. G. Harmon, A. H. Jensen and S. G. Cornelius* 1022
Relative Toxicity and Metabolic Effects of Cholecalciferol and 25-Hydroxycholecalciferol in Chicks. *Robert L. Morrissey, Robert M. Cohn, R. N. Empson, Jr., Harry L. Greene, O. David Taunton and Zigmund Z. Ziporin* 1027
Long-Term Protein Deficiency and Rat Liver Ribosome Cycle. *S. Gaetani, E. Mengheri, S. Scapin and M. A. Spadoni* 1035
Effects of Dietary Protein, Adenine, and Allopurinol on Growth and Metabolism of Rats. *D. L. Story, R. E. Shrader, L. L. Theriault, D. L. Lumijarvi, T. S. Shenoy, D. A. Savaiano, R. H. Shaffer, C Y. Ho and A. J. Clifford* 1044
Influence of Prolonged Fasting in the Dog on Glucose Turnover and Blood Metabolites. *Linda J. Brady, Michael K. Armstrong, Kathleen L. Muiruri, Dale R. Romsos, Werner G. Bergen and Gilbert A. Leveille* 1053
Serum and Duodenal Alkaline Phosphatase Levels in Fed and Fasted Magnesium Deficient Rats. *Patricia J. Neafsey and Ruth Schwartz* 1061
Effects of Diet Composition on Serum Levels of Insulin, Thyroxine, Triiodothyronine, Growth Hormone, and Corticosterone in Rats. *D. Rabolli and R. J. Martin* 1068
Brain Iron in the Rat: Extremely Slow Turnover in Normal Rats May Explain Long-Lasting Effects of Early Iron Deficiency. *Peter R. Dallman and Robert A. Spirito* 1075
Effect of Zinc Deficiency on Protein Synthesis in Brain and Liver of Suckling Rats. *John A. Duerre, Kathleen M. Ford and Harold H. Sandstead* 1082
Influence of Dietary Protein Levels on Rat Brain Enzyme Activities during Early Development *Robert S. Tyzbir, Juliette G. Coupain and Gary R. Beecher* 1094
Influence of Altering Dietary Protein Levels during Early Development of the Rat on the Activity of Several Brain Enzymes. *Juliette G. Coupain, Robert S. Tyzir and Gary R. Beecher* 1102
Effect of Dietary Composition on Hepatic Lipid Accumulation of Rats with Chronic Ethanol Intake. *Nelson S. C. Chen, Nancy C. Chen, R. J. Johnson, J. McGinnis and I. A. Dyer* 1114
Effect of Dietary Fats and Fatty Acids on the Liver Lipid Accumulation Induced by Feeding a Protein-Repletion Diet Containing Glycerol to Protein-Depleted Rats. *Yoritaka Aoyama, Akira Yoshida and Kiyoshi Ashida* 1120
Invitations for Nominations 1127

No. 7 JULY 1977

Persistence of Dietary Suppression of 3-Hydroxy-3-Methylglutaryl Coenzyme-A Reductase During Development in Rats. *Raymond Reiser, Glen R. Henderson and Barbara C. O'Brien* 1131
Effect of Plant Sterol Esters on the Absorption of Dietary Cholesterol. *Fred H. Mattson, R. A. Volpenhein and B. A. Erickson* 1139
Stimulatory Effect of Intraportal Ammonia on Plasma Uric Acid Concentration and Urinary Uric Acid Excretion in Chickens Fed a Low Protein Diet. *Yutaka Karasawa* 1147
Supplementation of a Semipurified Casein Diet for Catfish with Free Amino Acids and Gelatin. *James W. Andrews, Jimmy W. Page and Morgan W. Murray* 1153
Lack of Effect of Norethindrone and Mestranol on Folacin Depletion and Repletion in Rats. *Olga B. Martinez and Daphne A. Roe* 1157
Differential Effects of Dietary Methyl Esters of Long-Chain Saturated and Polyunsaturated Fatty Acids on Rat Liver and Adipose Tissue Lipogenesis. *Steven D. Clarke, Dale R. Romsos and Gilbert A. Leveille* 1170
Indications of Copper Deficiency in a Subpopulation of Alaskan Moose. *Arthur Flynn, Albert W. Franzmann, Paul D. Arneson and John L. Oldemeyer* 1182
Biological Effects of Feeding Graded Levels of Alkali Treated Soybean Protein Containing Lysinoalanine (N^{ϵ}-2-[carboxyethyl]-L-lysine) in Sprague-Dawley and Wistar Rats. *Barbara J. Struthers, Robert R. Dahlgren and Daniel T. Hopkins* 1190
Effects of a Prolonged Vitamin E Deficiency in the Rat. *L. J. Machlin, R. Filipski, J. Nelson, L. R. Horn and M. Brin* 1200
Lysine Deficiency and Carnitine in Male and Female Rats. *Peggy R. Borum and Harry P. Broquist* 1209
Exclusion of Pancreatic Exocrine Secretion from Intestine in the Pig: Existence of a Digestive Compensation. *Tristan Corring and Daniel Bourdon* 1216
Analogous Effects of Zinc Deficiency and Aspirin Toxicity in the Pregnant Rat. *Boyd L. O'Dell, Genevieve Reynolds and Philip G. Reeves* 1222
Glucose Kinetics in Vitamin A Deficient Chickens. *Robert W. Phillips and Cheryl F. Nockels* 1229
Effect of Protein-Energy Malnutrition and of a Powdered Diet on the Parotid Gland and Pancreas of Young Rats. *Dorthea A. Johnson, Leo M. Sreebny and Cyril O. Enwonwu* 1235
Biosynthesis of Muscle Proteins in the Fasted Rat. *Robert B. Low and Peter W. Cerauskis* 1244
Influence of Estrogen Treatment on Hepatic Cystathionine Synthase and Cystathionase of Female Rats Fed Varying Levels of Vitamin B-6. *Barbara Shannon and Peter Demos* 1255
Influence of Dietary Fat on Fatty Livers of Choline-Deficient Rats. *Catherine Carroll and Louise Williams* 1263
Urinary Riboflavin Metabolites in the Rat. *J. A. Tillotson and M. S. Karcz, Jr.* 1269
Influence of Dietary Fatty Acids on Liver and Adipose Tissue Lipogenesis and on Liver Metabolites in Meal-Fed Rats. *Steven D. Clarke, Dale R. Romsos and Gilbert A. Leveille* 1277
Effects of Selenium and Vitamin E Deficiencies on Reproduction, Growth, Blood Components, and Tissue Lesions in Sheep Fed Purified Diets. *P. D. Whanger, P. H. Weswig, J. A. Schmitz and J. E. Oldfield* 1288
Effects of Selenium and Vitamin E on Blood Selenium Levels, Tissue Glutathione Peroxidase Activities and White Muscle Disease in Sheep Fed Purified or Hay Diets. *P. D. Whanger, P. H. Weswig, J. A. Schmitz and J. E. Oldfield* 1298
Valine Requirement of the Growing Kitten. *A. J. Hardy, J. G. Morris and Q. R. Rogers* 1308
Purification, Identification and Characterization of a Growth Inhibitor in Faba Beans (*Vicia faba* L. var. minor). *Ronald R. Marquardt, A. Thomas Ward, Lloyd D. Campbell and Peter E. Cansfield* 1313
Further Studies on the Isolation of the Thermolabile Growth Inhibitor from the Faba Bean. (*Vicia faba* L. var. minor). *A. Thomas Ward, Ronald R. Marquardt and Lloyd D. Campbell* 1325
Peptidyl Transferase Activity in Rat Skeletal Muscle Ribosomes After Protein Restriction. *Alexandra von der Decken* 1335
Report of the American Institute of Nutrition Ad Hoc Committee on Standards for Nutritional Studies 1340
Invitations for Nominations 1349

No. 8 AUGUST 1977

Effect of High-Oleic and High-Linoleic Safflower Oils on Mammary Tumors Induced in Rats by 7,12-Dimethylbenz(α) Anthracene. *Seymour Dayton, Sam Hashimoto and Jerome Wollman* 1353

Determination of the Optimum Dietary Proportions of Lysine and Tryptophan for Growing Rats Based on Growth, Food Intake and Plasma Metabolites. *A. J. Lewis, E. R. Peo, Jr., P. J. Cunningham and B. D. Moser* 1361

Determination of the Optimum Dietary Proportions of Lysine and Tryptophan for Growing Pigs Based on Growth, Food Intake and Plasma Metabolites. *A. J. Lewis, E. R. Peo, Jr., P. J. Cunningham and B. D. Moser* 1369

Iron Supplementation of the Lactating Mouse and Suckling Neonates. *David Carmichael, Jack Hegenauer, Mariana Lem, Larry Ripley, Paul Saltman and Loren Hatlen* 1377

Mechanism of Lipid Accumulation in Rats Fed Wheat Diets. *Saroj Bahl and T. A. Venkitasubramanian* 1385

Potassium Requirement of the Growing Rat. *John G. Bieri* 1394

Effects of Zinc Deficiency and Zinc Repletion During Pregnancy on Parturition in Two Strains of Rats. *Jean Apgar* 1399

Malonaldehyde Content of Food. *Raymond J. Shamberger, Barbara A. Shamberger and Charles E. Willis* 1404

Effect of High Levels of Dietary Vitamin E on Hematological Indices and Biochemical Parameters in Rats. *N. Y. Jack Yang and Indrajit D. Desai* 1410

Effect of High Levels of Dietary Vitamin E on Liver and Plasma Lipids and Fat Soluble Vitamins in Rats. *N. Y. Jack Yang and Indrajit D. Desai* 1418

Effect of Histidine Intake and Hepatic Histidase Activity on the Metabolism of Histidine In Vivo. *Young Ae Kang-Lee and Alfred E. Harper* 1327

Interrelated Effects of Food Lipids on Steroid Metabolism in Rats. *Barbara C. O'Brien, Charles L. Skutches, Glen R. Henderson and Raymond Reiser* 1444

Effect of Cystine on the Metabolism of Methionine in Rats. *Martha Harney Stipanuk and Norlin J. Benevenga* 1455

Time Sequence of Changes in Hepatic Fatty Acid Synthesis in Rats Meal-Fed Polyunsaturated Fatty Acids. *Steven D. Clarke, Dale R. Romsos and Gilbert A. Leveille* 1468

Effects of Fasting and Feeding Various Diets on Hepatic Lipogenic Enzyme Activities in Coho Salmon (*Oncorhynchus kisutch* (Walbaum)). *Huangsheng Lin, Dale R. Romsos, Peter I. Tack and Gilbert A. Leveille* 1477

Lack of Effect of Ascorbic and Citric Acids on Calcium Metabolism of Chickens. *Mamduh Sifri, F. H. Kratzer and L. C. Norris* 1484

Fatty Acid and Glucose Metabolism in Selenium Deficient Rats and Lambs. *W. C. Fischer and P. D. Whanger* 1493

Quantitative Requirement of the Hatchling Green Sea Turtle. *Chelonia mydas*, for Valine, Leucine, Isoleucine and Phenylalanine. *Fern E. Wood and James R. Wood* 1502

Glycolytic, Hexose Monophosphate Shunt and Bactericidal Activities of Leukocytes in Ascorbic Acid Deficient Guinea Pigs. *Prakash G. Shilotri* 1507

Phagocytosis and Leukocyte Enzymes in Ascorbic Acid Deficient Guinea Pigs. *Prakash G. Shilotri* 1513

Zinc Requirement of the Young Guinea Pig. *Janet C. Alberts, John A. Lang, Pilar S. Reyes and George M. Briggs* 1517

Effect of Dietary Branched-Chain α-Keto Acids on Hepatic Branched-Chain α-Keto Acid Dehydrogenase in the Rat. *Balwant S. Khatra, Rajender K. Chawla, Allan D. Wadsworth and Daniel Rudman* 1528

A Biphasic Response of Rats to Cobalt. *Edward E. Roginski and Walter Mertz* 1537

Maternal and Fetal Response to Various Suboptimal Levels of Zinc Intake During Gestation in the Rat. *Gary J. Fosmire, Sharon Greeley and Harold H. Sandstead* 1543

Invitations for Nominations 1551

Proceedings of the Forty-first Annual Meeting of the American Institute of Nutrition ... 1555

No. 9 SEPTEMBER 1977

Max Josef von Pettenkofer—A Biographical Sketch. *David L. Trout* 1567
Effect of Dietary Threonine Supplementation of Tyrosine Toxicity in the Rat. *Kasturi Datta and J. J. Ghosh* 1575
Changes of Lipoamide Dehydrogenase and Mitochondrial Structure in Selenium-Deficient Chicks. *J. C. H. Shih, M. Sandholm and M. L. Scott* 1583
Effects on the Products of Conception of Protein Supplementation of the Diets of Rats. *Brian L. G. Morgan and Donald J. Naismith* 1590
Voluntary Activity, Cardiovascular and Muscular Responses to Anemia in Rats. *V. Reggie Edgerton, L. B. Diamond and Jeannie Olson* 1595
Pyridoxine Deficiency and Postnatal Development of Brain Aspartate and Alanine Aminotransferase Activities, and Cholesterol Levels in Chicks. *Felor Jourdikian and Nuhad Daghir* 1602
Zinc Excretion in Young Women on Low Zinc Intakes and Oral Contraceptive Agents. *Frances M. Hess, Janet C. King and Sheldon Margen* 1610
Effect of Dietary Fats on Oxidative Phosphorylation and Fatty Acid Profile of Rat Liver Mitochondria. *Puthezhath Divakaran and Alamela Venkataraman* 1621
Effect of Dietary Cholesterol and Tallow on Cholesterol Synthesis in the Castrated Goat. *Joan R. Thompson, Donald C. Beitz and Norman L. Jacobson* 1632
Long-Term Effect of Suboptimal Dietary Magnesium on Magnesium and Calcium Contents of Organs, on Cold Tolerance and on Lifespan and its Pathological Consequences in Rats. *O. Heroux, D. Peter and A. Heggtveit* 1640
Sensory Factors Which Affect the Acceptance of Raw and Heated Defatted Soybeans by Rats. *Michael Naim, Morley R. Kare and David E. Ingle* 1653
Nutritional Implications of the Maillard Reaction: The Availability of Fructose-Phenylalanine to the Chick. *Guy H. Johnson, David H. Baker and Edward G. Perkins* .. 1659
Significance of Formate as an Intermediate in the Oxidation of the Methionine, S-Methyl-L-Cysteine and Sarcosine Methyl Carbons to CO_2 in the Rat. *G. L. Case and N. J. Benevenga* 1665
Influence of Diet on In Vitro and In Vivo Rates of Fatty Acid Synthesis in Coho Salmon (*Oncorhynchus kisutch* (Walbaum)). *Huangsheng Lin, Dale R. Romsos, Peter I. Tack and Gilbert A. Leveille* 1677
Genetic Influence on Zinc Metabolism in Mice. *Brenda L. Reis and Gary W. Evans* .. 1683
Enhancement of Iron Absorption in Iron Depleted Rats by Increasing Fat. *Jean Bowering, Gary A. Masch and Allan R. Lewis* 1687
Effects of Malnutrition on Some Aspects of RNA Metabolism in the Maternal Liver and Fetal Tissues at Different Stages of Pregnancy in the Rat. *Brian L. G. Morgan and Myron Winick* 1694
Analysis of Chromium Induced Carbohydrate Intolerance in the Rat. *James Wooliscroft and Jose Barbosa* 1702
Vitamin B-6 Deficiency in Germfree Rats. *Yukiko Sumi, Masasumi Miyakawa, Masanori Kanzaki and Yahito Kotake* 1707
Food Intake, Body Weight Gain, and Body Composition of the Young Obese (ob/ob) Mouse. *Pi-Yao Lin, Dale R. Romsos and Gilbert A. Leveille* 1715
A New Method for Estimating Energetic Efficiencies. *L. J. Koong* 1724
Cyclic AMP and GMP Levels in Thymocytes and Splenic T and B Lymphocytes in Protein Deprived Rats. *Colette Spach and Alexandre Aschkenasy* 1729
Metabolism of Protein and RNA in Liver of Rats Deprived of Tryptophan. *Ronald Böcker, Ian K. Jones and Walter Kersten* 1737
Effect of Ethane-1-Hydrox-1, 1-Diphosphonate (EHDP) and Dietary Fluoride on Biomechanical and Morphological Changes in Chick Bone. *M. M. Chan, R. S. Riggins and R. B. Rucker* 1747
Biohydrogenation and Availability of Linoleic Acid in Lactating Cows. *Wilson Mattos and Donald L. Palmquist* 1755
Errata 1582

No. 10 OCTOBER 1977

Xylitol Associated Changes in Amylase and Protein Content of Monkey Parotid Saliva. *Janice L. Bird, Bruce J. Baum, Kauko K. Makinen, William H. Bowen and Robert W. Longton* 1763

Influence of Diet Composition on Nitrogen Balance and Body Composition in Meal-Eat- and Nibbling Rats. *Aysel Ozelci, Dale R. Romsos and Gilbert A. Leveille* 1768

Amino Acid Absorption Along the Intestinal Tract of Chicks Fed Heated and Raw Soybean Meal. *Rachel Bielorai, Musha Tamir and S. Hurwitz* 1775

Anemia of Lead Intoxication: A Role for Copper. *David S. Klauder and Harold G. Petering* 1779

Oxidative Deterioration of the Muscle Proteins During Nutritional Muscular Dystrophy in Chicks. *J. C. H. Shih, R. H. Jonas and M. L. Scott* 1786

Effect of Dietary Vitamin E and Aging on Tissue Lipofuscin Pigment Concentration in Mice. *A. Saari Csallany, K. Lund Ayaz and Le-Chu Su* 1792

Dietary Glycine Requirements for Growth and Cellular Development in Chicks. *Axuan Ngo, C. N. Coon and G. R. Beecher* 1800

Early Effects of Hypervitaminosis A on Gluconeogenic Activity and Amino Acid Metabolizing Enzymes of Rat Liver. *K. N. Dileepan, Vishwa Nath Singh and C. K. Ramachandran* 1809

Fetal and Maternal Vitamin A Levels in Tissues of Hypervitaminotic A Rats and Rabbits. *Carol A. Lorente and Sanford A. Miller* 1816

Sparing Effect of Folic Acid Deficiency on the Development of Vitamin B_{12} Deficiency in Baboons Fed a Vitamin B_{12} Deficient Diet. *F. Jacob and R. C. Siddons* 1822

Morphology of Erythrocytes from Vitamin E-Deficient Lead-Poisoned Rats. *Orville A. Levander, Murray Fisher, Virginia C. Morris and Renato J. Ferretti* 1828

Effect of Aspartame and Aspartate Loading Upon Plasma and Erythrocyte Free Amino Acid Levels in Normal Adult Volunteers. *Lewis D. Stegink, L. J. Filer, Jr. and George L. Baker* 1837

Influence of Vitamin C Restriction on Guinea Pig Adrenal Calcium and Plasma Corticosteroids. *Marianna K. Fordyce and Margaret E. Kassouny* 1846

Glutathione Peroxidase System and Microsomal Lipoperoxidation in Prenecrotic Stages of Dietary Hepatic Necrosis in Rats. *Eduardo A. Porta, Baron K. F. Ching and Nam S. Joun* 1852

Some Carbohydrates Found in Pollen and Pollen Substitutes are Toxic to Honey Bees. *Roy J. Barker* 1859

Ketogenic Response to Medium-Chain Triglyceride Load in the Rat. *Andre Bach, Henri Schirardin, Andre Weryha and Marthe Bauer* 1863

Characterization of the Lactation-Dependent Fatty Liver in *myo*-Inositol Deficient Rats. *Louis E. Burton and William W. Wells* 1871

A Strain Specific Increase in Blood Glycerol Level of the Carbohydrate-Sensitive BHE Rat. *Lilly B. Gardner, Elizabeth B. Spannhake and Sheldon Reiser* 1884

Effect of Zinc Deficiency on the Immune Response of the Young Adult A/J Mouse. *Pamela J. Fraker, Suzanne M. Haas and Richard W. Luecke* 1889

Effect of Meal-Feeding on Insulin Sensitivity and Incorporation of [U-^{14}C]Glucose into Lipids in Rat Aorta. *Kerin O'Dea, Harry Kaplovitz and Anthony Marino* 1896

Effects of Thiamin Deficiency on Acetylcholine Levels and Utilization *In Vivo* in Rat Brain. *Charles V. Vorhees, Dennis E. Schmidt, Robert J. Barrett and Steven Schenker* 1902

Short- and Long-Term Effects on Nitrogen Metabolism of Feeding Protein During Mild- or Severe Energy Restriction. *Joyce A. Nettleton and D. M. Hegsted* 1909

Response of Chick Parathyroid Glands to the Vitamin D Metabolites, 1,25-Dihydroxycholecalciferol and 24,25-Dihydroxycholecalciferol. *Helen L. Henry, Alan N. Taylor and Anthony W. Norman* 1918

Formation of Methionine from α-Amino-n-Butyric Acid and 5'-Methylthioadenosine in the Rat. *Cecile H. Edwards, Wilda D. Wade, Mary M. Freeburne, Evelyn G. Jones, Robert E. Stacey, Larry Sherman, Chung-Woon Seo and Gerald A. Edwards* 1927

Effect of Folacin Deficiency on Folacin-Binding Proteins in the Rat. *Marilyn M. Zamierowski and Conrad Wagner* 1937

No. 11 NOVEMBER 1977

Protein Utilization of Mechanically Deboned Meat by Growing Rats. *Yet-Oy Chang and Ray A. Field* 1947

Sites of Organic Acid Production and Patterns of Digesta Movement in the Gastrointestinal Tract of the Rock Hyrax. *Edgar T. Clemens* 1954

Increased Muscle Phosphorylase in Rats Fed High Levels of Vitamin B_6. *Arthur L. Black, Beverly M. Guirard and Esmond E. Snell* 1962

A Multifactor Analysis of Growth in the Rat Epididymal Fat Pad. *Margot P. Cleary, M. R. C. Greenwood and Jo Anne Brasel* 1969

Mediation of Calcium Adaptation by 1,25-Dihydroxycholecalciferol. *John L. Omdahl and Hector F. DeLuca* 1975

Effect of Treadmill Speeds and Slopes on Voluntary Exercise in Rats. *Robert E. Squibb, Jr., George H. Collier and Robert L. Squibb* 1981

Effect of Feeding Soybean Flour Containing Diets on the Protein Synthetic Pattern of the Rat Pancreas. *Jan Dijkhof, Swiebertus R. Poort and Cees Poort* 1985

Differential Absorption of Endogenous and Exogenous Cholesterol in the Chick as Affected by Dietary Oil Level and Phytosterols. D. *Sklan, Mazal Dahan, P. Budowski and S. Hurwitz* 1996

Maternal-Fetal Exchange during Protein Malnutrition in the Rat. Placental Transfer of α-Amino Isobutyric Acid. *Pedro Rosso* 2002

Maternal-Fetal Exchange during Protein Malnutrition in the Rat. Placental Transfer of Glucose and a Non Metabolizable Glucose Analog. *Pedro Rosso* 2006

A Comparison of Hypocholesterolemic Activity of β-Sitosterol and β-Sitostanol in Rats. *Michihiro Sugano, Hidekazu Morioka and Ikuo Ikeda* 2011

Effects of Geophagia (Kaolin Ingestion) on the Maternal Blood and Embryonic Development in the Pregnant Rat. *E. Charlene Patterson and David J. Staszak* 2020

Accumulation of Orthochromatophilic Normoblasts in Bone Marrow of Vitamin E-Deficient Monkey, *Macaca fasicularis*. *Rachana Santiyanont, Chanthiypa Yaipimol and Prapon Wilairat* 2026

Sulfur Amino Acid Requirement of Channel Catfish: L-Methionine and L-Cystine. *Dwight E. Harding, Otis W. Allen, Jr. and Robert P. Wilson* 2031

Gluconeogenesis in Ruminants: Propionic Acid Production from a High-Grain Diet Fed to Cattle. *William M. Yost, Jerry W. Young, Stephen P. Schmidt and A. Dare McGilliard* 2036

Effect of Dietary Histidine Deprivation in Two Rat Strains on Hemoglobin and Tissue Concentrations of Histidine-Containing Dipeptides. *Michael R. Quinn and Hans Fisher* 2044

Histidine Status in the Chick as Measured by Growth Rate, Plasma Free Histidine and Breast Muscle Carnosine. *Kelly R. Robbins, David H. Baker and Horace W. Norton* 2055

Control of Blood Cholesterol Levels in Suckling and Weanling Rats. *P. Hahn, J. Girard, R. Assan, J. Frohlich and A. Kervran* 2062

Effects of Dietary Histidine and Arginine on Nitrogen Retention of Men. *Helen L. Anderson, Ei Soon Cho, Patricia A. Krause, Kenneth C. Hanson, Gary F. Krause and Robert L. Wixom* 2067

Effects of Dietary Histidine and Arginine on Plasma Amino Acid and Urea Concentrations of Men Fed a Low Nitrogen Diet. *Ei Soon Cho, Gary F. Krause and Helen L. Anderson* 2078

No. 12 DECEMBER 1977

Effects of Energy or Protein Deprivation and Subsequent Rehabilitation on Protein and DNA Content of Several Organs in Rat Pups. *Herbert C. Lau and S. J. Ritchey* ... 2091

Effect of Dietary Fat Level on Growth and Lipogenesis in the Colostrum Deprived Neonatal Pig. *Ronald G. Wolfe, Charles V. Maxwell, Eldon C. Nelson and Ronald R. Johnson* ... 2100

Independence of Glycogen Accumulation and Glucose-6-Phosphate Dehydrogenase Induction in Rat Liver. *Charlotte Slayton Nace and Bela Szepesi* ... 2109

Tannic Acid and Oxidized Tannic Acid on the Functional State of Rat Intestinal Epithelium. *S. Mitjavila, C. Lacombe, C. Carrera and R. Derache* ... 2113

Cystine Content of Legume Seed Proteins: Estimation by Determination of Cysteine with 2-Vinylquinoline, and Relation to Protein Content and Activity of Cysteine Synthase. *Byron L. Bertagnolli and Randolph T. Wedding* ... 2122

Characterization of Food Binding of Vitamin B-6 in Orange Juice. *Edward W. Nelson, Charles W. Burgin and James J. Cerda* ... 2128

Effect of Oxidants, Hydrazines, and Aminoquinolines on the Filterability of Erythrocytes from Vitamin E-Deficient Lead-poisoned Rats. *Orville A. Levander, Virginia C. Morris, and Renato J. Ferretti* ... 2135

Effect of Chronic Ethanol Administration on Thiamin Metabolism in the Rat. *Mesbaheddin Balaghi and Robert A. Neal* ... 2143

Influence of Dietary Glycerol on the Serum Lipoproteins of Rats Fed a Fat-Free Diet. *K. Ananth Narayan, John J. McMullen, Troy Wakefield and William K. Calhoun* 2152

Variations in the Mast Cell Population of Skin and Bone Marrow in Magnesium-Deprived Rats. The Influence of Sex Hormones. *Leonard F. Bélanger* ... 2164

Comparison of Feeding Unrefined and Refined Starch Diets on Intestinal Uptake and Hepatic Lipogenic Enzymes in the Rat. *O. E. Michaelis IV, J. G. Hallfrisch, J. D. Putney, D. J. Scholfield and S. Reiser* ... 2171

Effects of Magnesium Deficiency on Protein and Nucleic Acid Synthesis *In Vivo*. *Franklin J. Zieve, Kenneth A. Freude and Leslie Zieve* ... 2178

Influence of Zinc Deficiency on Retinal Reductase and Oxidase Activities in Rat Liver and Testes. *P. Rammathan Sundaresan, Frederick O. Cope and J. Cecil Smith, Jr.* 2189

Effect of Vitamin A. Deficiency on Calcium and Glycosaminoglycan Metabolism in Guinea Pig Bone. *Suzanne S. Harris and Juan M. Navia* ... 2198

Ketogenicity of Soybean Oil, Coconut Oil and Their Respective Fatty Acids for the Chick. *Sharon J. Young and Ruth Renner* ... 2206

Effect of Diet Restriction on Some Key Enzymes of Tryptophan-NAD Pathway in Rats. *Uppala Satyanarayana and Bagepalli S. Narasinga Rao* ... 2213

Effect of Low Zinc Intake and Oral Contraceptive Agents on Nitrogen Utilization and Clinical Findings in Young Women. *Frances M. Hess, Janet C. King and Sheldon Margen* ... 2219

Effects of Perinatal Malnutrition on Lipid Composition of Neural Tissues from Rhesus Monkeys. *Oscar W. Portman, Manfred Alexander, Martha Neuringer, Miles Novy, Roger Illingworth and Hideo Uno* ... 2228

Biological Activity of Vitamin E Compounds and Natural Materials by the Resorption-Gestation Test, and Chemical Determination of the Vitamin E Activity in Foods and Feeds. *Torben Leth and Helge Sondergaard* ... 2236

Effects of a Low Calcium Prepartal Diet on Calcium Homeostatic Mechanisms in the Cow: Morphologic and Biochemical Studies. *J. T. Yarrington, C. C. Capen, H. E. Black and Richard Re* ... 2244
